Art Thompson at my reports
that placer mines on Little
Spence Ck Athol have drilled
& trenched a new || Spence
Ck channel to W of existing
channel. Pt suggests up to
 $\frac{1}{4}$ oz reported plus Au/Pt
combined suggests ~ 700/300
Au/Pt - very rare!

No source known. May
be headwaters Spence but no
other Pt reported. Only
Os, Fr found by Bruce Ballantyne
in Athol - wide shales
- may be buried Cache Ck
deposits - jossno stock.
