

Talk to Dave's Midway/  
Silvertip

675143

Joanne has done some separation  
1040/16

\* forwarded to John?

\* fingerprint Sulph + carbonate

x one good sample should be  
prioritized. altered dyke

\* B1 heat hole for sericite hfl

TPY, PO, CU sericite is anom

in F: 2-3% F - highest in

F. Date of 74.7 from

the sericite. Resample deeper  
Dure ~ 220 - 50 deeper.

\* Dave suggests F sample in mineral  
range from .1 - 3% F - suggests  
student project to Strathcona Min Sch.  
only mineral is F rich.

\* 75-78 Ma from biot rich mafic  
dyke from Ronchessa area  
Meister area Grant Hwy.

882-1 284.2m : 74.7 Ma date.

resample, some site, deeper.

Midway 1987

reserves

1.2 M. tons

11.96  $\frac{oz}{t}$  Ag

9.6% Zn

7.0% Pb
