Talk to Sam May 21/85

- Dmy-Rancharia property
^{they} don't yet have pore property
- Can't locate Klumars. in section.
- Have compiled outcrop & rock type data. Will call me in 2-3 days.
- Trace 1st hardrock - good linear: 1300 m to W: Zn + low Ag values.
- may have 6x pipe. Float. not yet explored. MAX MIN pattern: high primary field distribution: creolite pattern

Claims seized by non payment
of wages by Marbaco - offered for
sale. But debentures outstanding
against claims. Must
clear all debentures before
sale goes through.

- Road Tactic R. - not good
before mid July; high water.
- Pete Ch. working on adjacent
properties. Gary Medford
worked with him last year.
- REG Redwood - arrested by
Maranda. Block adjoining Silverkeys
Street ^{DPH} about June 7. Pete C
superintending

Barry Price working with
Pete Christophers

John Bradford UBC MSc candidate

May 11/87 reports

At Maricao - large body of taurmaline
bearing green mica altered granite
exposed in trenching apparently
on strike with and possibly
could cutting trend of po-bearing
ore lenses. KAr 92 Ma on muscovite.

Relation to Cañon unknown but
may be aphyreic.
