Bullion Cr.  
104 I/07

Tom Scott showed Sept 1/82

re new strat PZu disc.  
away between Koglichad

& Kutchu. 2 holes around

in 1st beneath black sil  
stone - midstone (DD)

Good grade now baritic (?)  
bedded py - sph - gal.

No Ba geochem done yet.

Advise him to call  
Gabe re strat significance  
of rock unit identified.

---

Oske recognizes Dd strata in area  
overlying rocks = Pined R. rocks  
- in Gal. basin (?)

chlorite schist (calc?)

{ 10m thick, 1st

{ siltst + limy slst.

black schist

~ 100m thick

{ unmetamorphosed basalt  
over 500', laminated; gritty;  
turns acidic towards base

2 hole crinoid lst  
5-10m thick.

part or  
uncomp
