

Red Mtn Adrian Bray Loc Minerals

Swat ore - galena discovery 15 km NE of Stewart

Host claystone
Contact reefed almost surrounded

1965 purple Mo discovery

1975 Au found S on overstrike

H₂O / Fe₂O₃ purple 200m into Kupferberg beds

2 Au zones in alt purple & bedded massive
unconformities 13000-18000 m ADN

AV MARC GY 11 zones

+ unmineralized, at contact in alt d purple.

.5-1 g/t Au in alt d purple.

5-8 g/t Au in alt bed purple bx.

Au in volcanoclastic unit between 2
porphyrylike rock units.

more 1.21 mt 12.7 g/t 4000 g/mt

ADN 1.31 mt 13.05 g/t 24.85 g/t Ag

Inventory, not measured.

* / Na depletion Zn > 100 ppm copper
to ore zone enrichment

As enrichment > 100 in HW

Sb > 20 ppm unaccounted to ore zone

Na₂O depletion = H₂O, Ba enrichment

In and g. massive pyrite

Pb, bismuth, arsenic in ore

As, Cu, Au

pyrite, FeTe₂

electrum

pyrite, AuTe₂

tetrahedrite

Au taken in by masses of melnikovite
& veins within pyrite.
