Gatcha M. McLaren vent May 29/80

To drill holes on pit portion of  
deposit = 50000T of 1.5% W on  
coarse schistite porphyroblasts in  
partially replaced marble + kyanite schist  
unit of Shinarump.

Raised \$50000 privately, plan to  
go public. Will build small mill,  
sell to Bishop Cal (V. Carbide)

Open pit are great value ~ \$6M, but  
large tonnage indicated down plunge.  
Was not drilled.

Best gtz magnetite very dry, unmineralized.  
Leucogranite traceable ~ 1000' on property  
& may be regional control for more  
W. shows. Radiations of more W  
in area.
