

Talk to Jim Miller Tate phone April 28/94

Boalorne / Pioneer Gold Mines Ltd about to be
listed on VSE.

New working in COUNTLESS tunnel, between
Boalorne & Pioneer. Extensions of Coronation and
Little Star veins to N(?)
Worked 1912-1913.

Two veins #52 #77

CORONA drilled below this zone of proven
veins, three drill holes hit.

Tyndall recommended development work on
that basis.

About 150' of back proven = 150,000T of .3(±)

Good potential for 300,000T of .5oz ±

51B vein is unusual 3' of 5oz/T in a

flat splay with massive pyrite + galena, sphal.

What structural control?

Not common seen vein.

- Albitite dykes in zone - U/Pb dating?

Present work is compilation, mapping
