Conodont specimen from NOVA claim

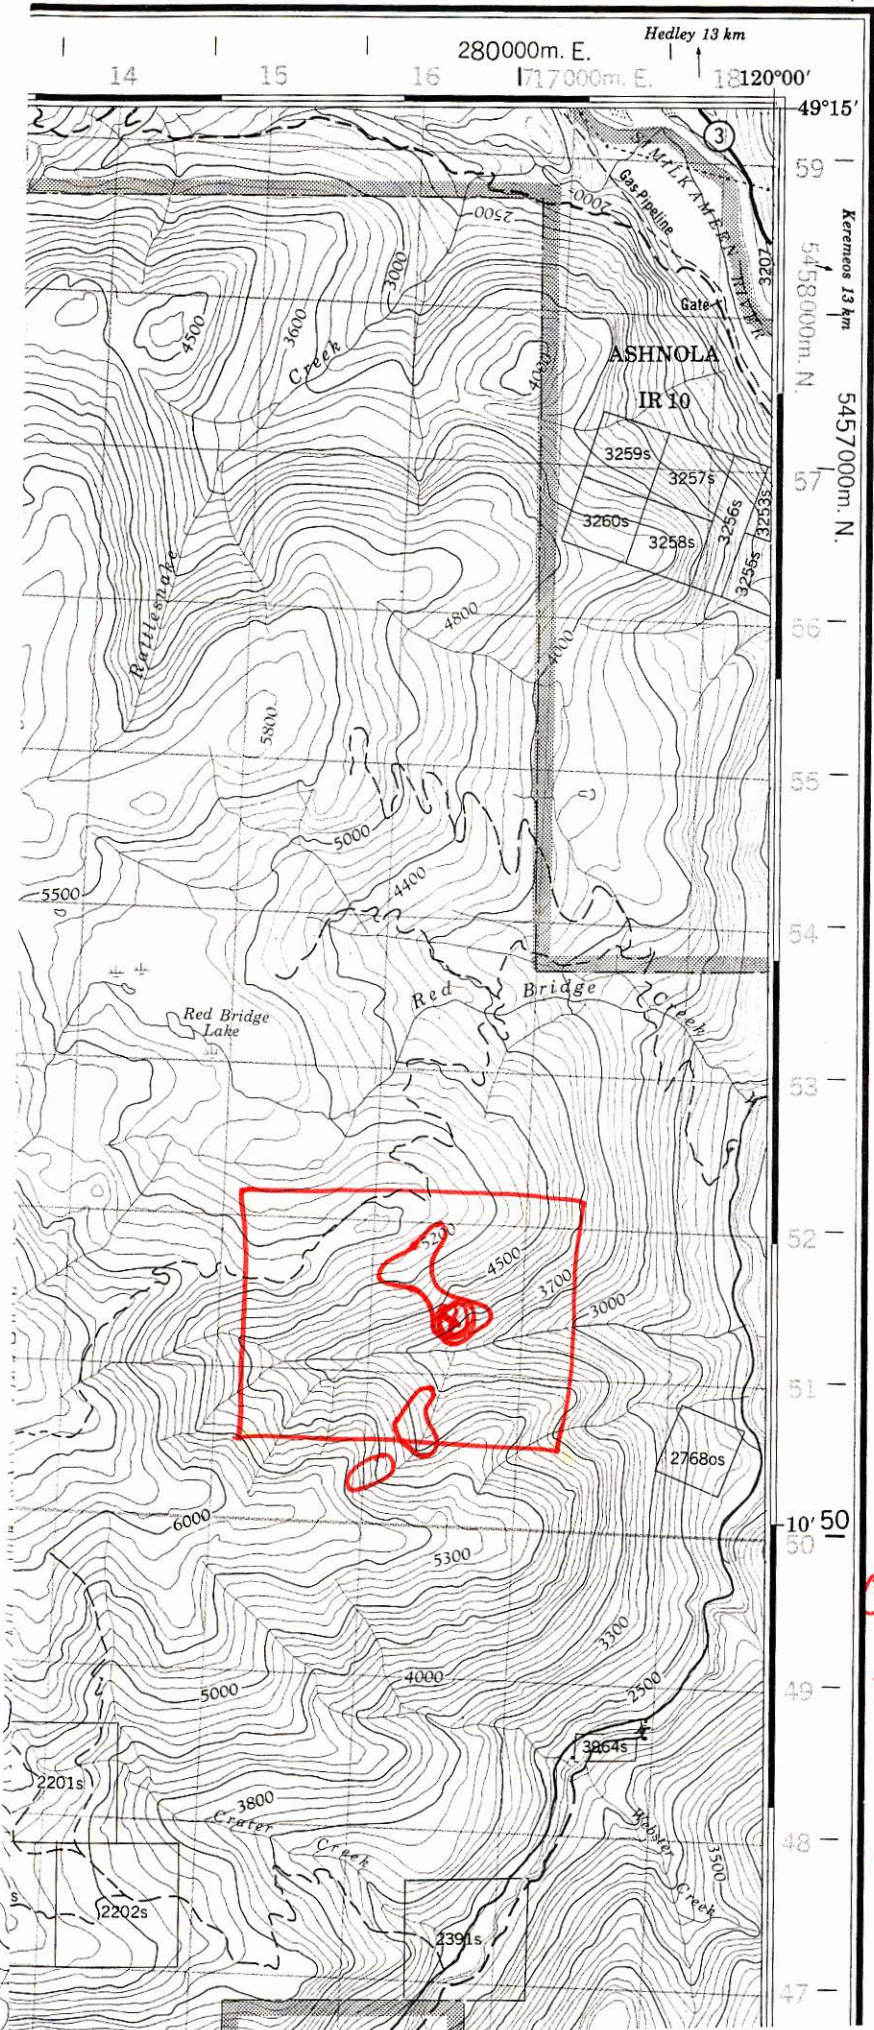

Dear John

There is Mike Orchard's Report No MTO-1495-26 on the Middle Devonian limestone. Specimen No. DY 3490 was located just about at the centre of the NOVA claim block. Host Apex Mountain Group rocks, according to Mike, are not known to be as old as mid Devonian elsewhere.

You should let Mike know when you are going to visit the claims again, and he may wish to make a better collection.

Best regards

Ken
