---------------------	--------------------------	------------------------	--------------------------	---------------------------	-----------

0.92 44.5 6.0% 6.0%

"ROB ROY"

"D.E. WHITTAKER"

Asst. Provincial Govern-
ment Assayer.

"KITCHENER" group of Mineral claims:

Namely:

Kitchener -- Good Hope -- Ruby -- and Nevada.

Situated in the Telkwa District of the Omineca Division on Bonanza Mt., near the head of the Telkwa River about 30 miles from the town of Telkwa, B.C., a good wagon road for 16 miles, the balance of the distance a good trail plenty of feed and water. Formation is granite. Contact being granite and porphray. Ledge is running in an Easterly and western direction, dipping South about 45 degrees traceable forty five hundred (4500') ft. the entire length of three claims, width from 2 to 10 feet. Ore showing at different intervals the entire length when the ledge has been broken into two different shoots of ore from 4 to 8 feet in width from 100 to 200 feet long massive in character Nature of ore Silver Lead carrying good values in gold and iron zinc; most work done in open cuts, stripping etc.

"JOHN M. GILLESPIE"

"ROB ROY" group of Mineral Claims

Namely:

Rob Roy -- Waverley -- Talisman -- Richard
Rowena -- Ivanhoe.

Situated in the Telkwa District of the ~~M~~mineca Division, on Silver Tip Mt., at the head of the Telkwa River, about 30 miles from the Town of Telkwa B.C., on the main line of the Canadian National Railway. There is a good wagon road for 16 miles, the balance of the distance is a good trail which the Mines Department of the Provincial Government keeps open. The 30 miles is through a level country and follows the river. There is plenty of feed and water.

Formation is granite and the contact vein granite and porphray. Ledge is traceable for 9000 feet, across the full six claims and is from 1 to $3\frac{1}{2}$ feet in width and there is every indication of another ledge being above. The one ledge runs in a easterly and westerly direction, dipping 45 degrees South.

Nature of ore is silver lead, carrying good values in Gold and six per cent zinc.

"JOHN M GILLESPIE"

"KITCHENER" group of Mineral Claims

Namely:

Kitchener -- Good Hope -- Rub y -- Nevada.

Situated in the Telkwa District of the Omineca division on Bonanza Mt. near the head of the Telkwa River about 30 miles from the town of Telkwa B.C. There is a good wagon road for 16 miles, the balance of the distance is a good trail which the mines Department keeps open. There is plenty of water and feed and the 30 miles is practically level country to the foot of the ~~XX~~ Mountain where the claims are located.

Formation is Granite. Contact vein is granite and porphray. Ledge is running in an easterly and westerly direction, dipping South about 45 degrees and is traceable forty five hundred (4500) ft. the entire length of three claims. Width from two to ten feet.

Ore showing at different intervals the entire length where the ledge has been broken into two different shoots of ore from 4 to 8 feet in width, from 100 to 200 feet long. Massive in character. Nature of ore silver-lead carrying good values in gold some zinc. Most work done open cuts and stripping etc.

ROB ROY

In the matter of the Rob Roy group of Mineral Claims consisting of six claims. Same road and trail as going to Kitchener group but turn off at Milk Creek and go to head of Telkwa River. Same formation and contacts vein as Kitchener group. Ledge can be traced 9000 ft. across the 6 claims and is from 1 to $3\frac{1}{2}$ ft. in width.

Nature of ore is silver lead and gold.

"JOHN M. GILLESPIE"

Terms:

Rob Roy claims will give option till July 31/25
After examination will sell for \$20,000 cash or bond on
the following terms:

After examination	\$2,500 Cash
July 31/26	5,000
-- /27	15,000
-- /28	17,500
	\$40,000

The bonder to do assessment work first year
and crown their second or third year.

MURRAY'S RANCH,

TELKWA, B.C.

December 18th, 1924.

Dear John:

Received your letter O.K. and was glad to hear from you. About those claims of mine on Grouse Mt. I have seven claims. There are two leads on them, one is nine feet of ore and the other four feet. I haven't had any Assays made in the last two years. The Assays three years ago gave me 11% copper on the big lead and 9 oz. silver and a \$1.60 in gold. On the smaller lead I got 16% copper, 3 oz. silver and a trace in gold. I can send you some samples as soon as I go to Telkwa. I am willing to give a good company any kind of deal they want. My price is \$2500.00 per claim. If cash or \$3000.00 on a bond I will give them twelve months time to prospect the ground and pay in two years. One payment in 12 months one in eighteen, and the final in two years.

Everything is about as usual here. We are having very cold weather 38 below today. McNeil is working the mine full blast, three fours hauling. Car Wakefield is head, Skinner and Goodwell is driving Prince in the mines. Haig and Affeck are both working. Jerry Hauley is running the engine and pump. I am hauling ties for Murray. The Government crew are building the new bridge across the Telkwa. They are busy at the concrete.

Hoping to hear from you again soon. Kindest regards to Mr. Gillespie and yourself and a Merry Christmas.

I remain yours,

"HUGH MCLEAN"

P.S. The claims are four miles from the railroad.
