

GETTY COPPER CORP.  
 GETTY SOUTH "TROJAN"  
 Geology

**Legend**

-  Guichon granodiorite
-  Breccia
-  Tertiary volcanics
-  Overburden
-  zone of >0.5% Cu mineralization as defined by surface trenching
-  zone of >0.3% Cu mineralization as defined by underground work
-  zone of prominent malachite-chrysocolla mineralisation as defined by surface trenching
-  97-1 Trench
-  GS96-01 90/-45 Diamond drill holes
-  0.17 high-grade interval [% Cu]
-  intersection of underground workings
-  lithologic contact

zones of Cu mineralization extrapolated (15 m)
