Subject: Getty Mines: Possible Visit

Ron

David Blann, a contractor working for Getty Mines, phoned yesterday. He has approval to cover costs for the proposed visit to Highland Valley. Now the question is whether we can get approval here.

>  
>Ron  
>  
>I got a call from Getty Mines last week regarding their property in the Highland Valley.  
>  
>They have accumulated much new data and asked if I would be able to visit to help them set the geology in its regional framework.  
>  
>I indicated that I would not be able to travel unless they were willing to pay costs. The consultant is checking with the company directors to confirm that they can do so.  
>  
>A proposed memo to Peter Ostergard to seek travel approval is appended.  
>  
>Bill  
=====  
>To: Peter Ostergaard  
> re: In Province Travel: Highland Valley, near Kamloops  
>  
>The attached form requests permission for Dr. W.J. McMillan to travel to Highland Valley to review the geology of the Getty North property with company consultants and advise them on the regional geological setting of the deposit.  
>  
>The company will cover travel costs for the visit.  
>  
>The value of the visit to the Ministry is that Dr. McMillan will be current with work on the property and new information aquired by the company. This information can be shared with Regional Geologist, Mike Cathro, who has visited the property several times. The value to the comapny is that Dr. McMillan is knowledgable about the geology of the region around the deposit.

*So what?*

*So what?*

*OVER*

>  
>The time for the proposed visit, if approved by the Minsitry and company  
directors, would be November 21 and 22, 1996.  
>  
>Your approval for this travel is requested.  
>  
>  
>
