TECK CORPORATION EXERCISES WARRANTS
DRILL MOBILIZED TO CAT MOUNTAIN

Lou Duarte, President of Lysander Gold Corporation (VSE - LYS) announces that Teck Corporation exercised, ahead of schedule, its' warrants to purchase an additional 200,000 common shares of Lysander at \$0.75 per share. Teck Corporation now owns 800,000 shares of Lysander, representing 13.1% of the common shares outstanding.

BP Resources Canada Limited, the operator of the Joint Venture, informs that the drill has been mobilized on to the CAT property to commence 8,500 feet of diamond drilling in 14 holes. These holes will follow 1989 diamond drilling results from holes A89-1 and A89-4 on the south face of CAT Mountain near the southern border of the 100% Lysander owned BET claim. These holes intersected Mount Milligan ore grades in gold and copper.

To date, a total of 22 line kilometers of soil geochemistry, ground magnetics and IP survey have been completed in the southern grid, at the bottom of CAT Mountain. Results from this field program will define drilling targets for the Stage II diamond drilling program.

The CAT Mountain property is a Mount Milligan-type, alkalic Au-Cu porphyry located in the Omineca Mining District of British Columbia. The project is the subject of a \$1.2 million 1989 Joint Venture exploration program operated by BP Resources Canada Limited (53%) on claims encompassing approximately 31 square kilometers. Lysander, in addition, holds a 100% interest in the BET claim, located in the centre of the BP/Lysander Joint Venture, as well as 100% interest in claims totalling approximately 21 square kilometers adjoining the Joint Venture ground to the north.

On Behalf of the Board of Directors
LYSANDER GOLD CORPORATION
