# GR 6 Claim

at Alberni Highway - turn  
at Pratt Road turn  
at Gratton Ave

← held 3 claims -  
overstacked with 6 units

- BC Forest Products road  
- gate locked !!

- Tree Farm 68  
← held claims 6 years

- George Rosbrugh

- Westmin Trench - put in in  
1970's

- photo #2 taken at SW  
end of trench shows  
folded magnetite-chalcopyrite  
- limestone on north  
side of photo

- photo #1 taken 75'-80' N.E  
of photo #2 - magnetite  
& chalcopyrite + pyrite; George  
mentioned assay of 62 Cu

- sample # 84172 taken across  
Elev. 2300' below peak (3200')  
1.6 metres - shear zone  
strikes  $290^{\circ}$  & dip is  
 $75-80^{\circ}$  N. E. Chlorite &  
carbonate alteration, one area  
has abundant (10-50%) pyrite  
over 2-3 cm

- location is on north  
side of logging road  
approx. 800 metres  
northwest of "Western  
Trench"

- photo taken of  
Shear zone - also  
shows 1.5 m fairly  
competent fragments  
then 30 cm wide  
shear zone

- sample # 84173 taken across  
1.7 m in pyrite zone  
(to 50% py.) & chalcocite  
(Elev. 2230') in open cut - pit 400 feet  
southwest of Western  
Trench - on trail  
southwest ~~of~~ from Western  
Trench - gangue is  
quartz (remobilized or  
silicified)

- sample # 84174 - taken across  
70 cm height in magnetite  
zone with dissem & coarse  
chalcopyrite in open cut  
in Westmin Trench

- strike of Trench is  $235^{\circ}$   
- fold zone in Photo #1  
is  $70^{\circ}$ - $80^{\circ}$  southwest of  
sample #84174

- magnetite showing on  
side of road at Elev.  
 $1800'$  -  $2.0$  m. wide  
- some dissem pyrite bands
