Dear Bert

Enclosed is a rough map showing test areas. Finished shuving below shaft. ground is averaging \$7.00 per yard for 3 ft thick pay zone to hard pan gold at \$445.00 an oz can. you can probably file two years work on 10348.

Will sluice some of the test pits in about a week. Best pits 2 and 3 look like good ground. Hard pan in pit has good pay - but need ripper to break it up. Hope you can make the cut.
