Dear Sir,

Re: Canorex-Vanco Joint Venture  
Slide Mountain Project  
Progress to June 30, 1982

Arrangements were made to have the proposed work program carried out by I. M. Watson & Associates Ltd. The property was visited June 16 - 18 to inspect the camp and access road. Camp facilities have been leased from Dome Mines Ltd. Minor road repairs were in progress at month end. Outcrops along a portion of the access road were examined. They are predominantly basic to intermediate tuffs and breccias, with some flow rocks and minor intrusions. Altitudes measured are few and unreliable due to the chaotic nature of the assemblage.

A four man field party was moving to the property on July 1st.

Yours truly,

J. F. White
