1988 RICHARDS DEACT CLAIMS TO ALPINE.

1987 MORRAINE SHOWING NE 300m x 600m.
HIGHEST Au GEOCHEM. CLEAR TREND.

Au to 1.06 grab (.114 Au/m)

1987 921 meters dd. no cigar (VLF)

1983 CANTHORNE & HODGESON.

Property steep & RUGGED. - GOLD EXPL.

12 showings E. quartz 270 Rock samples

2650 soil samples.

Best .33 Au

- Very large Epithermal system related to a porphyry stock. Lots of quartz float, lots of sampling and prospecting.

Dilled too soon.

- Insufficient high grade assays to justify substantial trenching or drilling programme.

- Located within a prominent regional gold anomaly which should be prospected further.
