

Hixon Creek Area

- HQ claims.
- HQ claims (include Hixon Quartz workings)
 - AR 12129 mentions malposite +ankerite in old workings (dump, pits) + new exposures
 - 1981 trenching best assay: 0.154 opt Au
 - ultramafics not seen but mag seems to indicate it.
 - 1981 drilling (NQ) best assay: 0.167 opt Au / 1.5m
 - best grade in shears along greenstone/shist contact.

- G-claims
- bracket HQ claims + extend southeast, parallel but slightly west of Eureka Thrust.
 - no ultramafic correlation mentioned.
 - mineralization related to "quartz bearing carbonatised volcanics on margins of diorite-granodiorite dykes"
 - showings on Government Creek, Ahbau Creek and Yardley Lake (AR ~~17309~~ ¹⁰¹⁵³)
 - 1) Yardley Lake: qtz carb w/ py, cp, bor, mal, az up to 0.13 opt Au (grab)
 - 2) Ahbau Creek (G-south): mass. sulph. veins in ag up to 1% Cu, 1.0 opt Ag, 0.05 opt Au
 - ownership: G claims => Gabriel (Appian) Res.
HQ claims => Calpetto Res.

- Ahbau Creek cont: (AR 17309)
 - 1987 drilling: 1.22 opt Au / 0.9m, 0.22 opt / 4.6m
 - 500m strike tested w/ drilling
 - 1800m strike indicated by mag.
