No. 2 Bore Hole

No. 1 Bore Hole started from this point near the mouth of No. 2 and No. 3 and ran down. At the time it was drilled it was assumed to be on the floor of No. 1 Seam. Later developments proved it to be on the floor of No. 2 Seam. The 200 ft of Conglomerate between the two Seams No. 2 and No. 3 is of the depth having thinned out to a few feet of dark shale.
