Q42 Diorite!
It appears that this Dike contains copper because fair amount of Malachite / Azurite staining.

Dike 9.

Argillites at end of Dint for 10' back from end of drift

Down to No 2 Level.

Argillites Malachite on top of Dike

Dike Dips (Flow by dyke)

Bedding
Limestone? (Silicified) pyrite
jambes
Caliche has covered rocks
Graphitic Argillites

"Stope"
Mined Out

Ore zone continues (Py, Pbs)

Shewing? Tourmaline? Limestone (Silicified) fairly well fractured

Ore breccia Ore horizon Some Dior. Slat. as thinning lead bed cns at Dint pitch 1/2 in at this point 3' ± high (Py, Pbs)

Sample D

Win #2

Ore horizon appears to dip here? do March of this point (pitch)

Graphitic Argillites Ore zone appears to be above + below the argillites. Pbs appears lower in mine D.

Copper (Malachite Green) Ore horizon (Ore breccia) shows up along this section of Dint

Punta Pks Melochide

Graphitic Argillites

Argillites, Q42
