*SPÄTLESE: ("late harvest") the wine comes from grapes which are picked after completion of the normal harvest. They have, therefore, an even higher degree of maturity and this, in turn, means more flavour, fruitiness and delicacy due to the special climatic conditions.

*AUSLESE: ("selective harvest") the wine is made from only the best bunches of grapes, selected and pressed separately. Some of these grapes have the world-famous and rare Edelfäule" (noble fungus). This conditions causes a natural concentration of sugar and flavour.

All prices include 5% Provincial Sales Tax.
