Dear Arch:

Enclosed please find a copy of the full report by Bill Sharp on my Atlin properties. I am, of course, most interested in the Otter and Wright Creek properties but the hard-rock prospects look excellent for the Lucky Gold-Silver property. We have received considerable drill and other data from various sources and also have finally gotten the Drain Lease which I wanted to acquire before proceeding with the program. Now that my assembly is complete on Otter Creek I would appreciate your reviewing this and giving me any thoughts you might have as to whether you would like to inspect the property, talk with Bill Sharp to whom I am sending a copy of this letter or whether you are free to undertake a project of this type at present. After you look over the material and talk to Bill we can discuss whatever would be the next step toward the determination of the proper mining procedure and financial requirements. In regard to finances, I have discovered a buyer for the product who is very interested and claims he is able to assist the financing of production, in turn for a supply contract to him. I am attempting to check out and qualify this individual and his company so that I may know whether this is a reliable source of funds. I cannot see how the project would require as much as Atlanta unless a dredge is the answer. In any event, it is a completely different type of project and would require the critical eye and good suggestions of Angus.

With best personal regards and hopes that this finds you and others at CMS in good health and spirits I am,

Sincerely,

A handwritten signature in cursive script that reads "Rutherford Day". The signature is written in black ink and has a long horizontal line extending to the right from the end of the name.

Rutherford Day
