

= On apparent S. Projection of Crowned Mt.
Skutumpah Creek regional lineament

- Heavy overburden precludes satisfactory geol.
mapping;

Resort to prelim. flux-gate mag and
soil sampling procedures.

Geochem on contract; to include prelim.
eval. of soil types.

- recommend dropping the S.E. Rock group.

- Boss & Hank Gunning favour putting 1-2

men into field for general prospecting -

W.A. recommend supp. soil sampling

W.A. mentioned Bondar-Clegg contract services

W.A. recommend staking all avail ground E & W. of
Farr group for length of group.

False geochem anomalies

1. Float trains.

2. ground-water seepage or transport out of
source region.

Barringer poss best people to analyze
problems and set up program of
geochem work.
