| | Boot Claims Assessment. |

MESSAGE

Dear Fritz,

Assessment on the Boot claims was completed February 13 th.

One years assessment was recorded on Boot 1 - 10 on February 12th.

Stripping on Boot 6 revealed a N 10 W striking quartz veinlet with Malachite on fractures and in a minute part of the vein, apparently continuing for only a short length.

N 50 E striking quartz stock works did not spread or lengthen on strike, from the located outcrops.

One trench was put in adjacent to soil sample R 5, and only massive Nicola andesite was found.

A total of 65 hours of Cat work were done, at \$ 24.00 per hour.
This bill will run around \$ 1600.00

cc W. MM Sharp

Yours John
