

Burton Gold Mines Ltd. ~~Friday Point~~
(old Abco Mines Ltd) Herbert (Arms) Inlet

801099

Burton Gold -
Formerly - Abco Mines Ltd

1962 - B.I. Clayton, Pres.
J.C. Jackson, Mgr.

A crew of 2 men did 950' of dia. drilling
at the face of the 1000 ft adit level.

1961 - A crew of 3 extended the 1000-foot
level adit to a total length of 915 feet,
at which point it was reported the
drift intercepted a 12 foot clyke. The
drift face is now approx. 500 feet
south of, and 800 feet vert. below
the lowest exposed vein etc.

1960 - 21 cgs. min. claims on south slope of
Abco Mt. at head of Herbert Inlet.

Prev. known as Abco Mines Ltd.

Prev. work consisted of extensive
stripping on several vein occurrences and
the driving of adits at elev. 2300, 2145,
86 tons ore shipped 1935-38.

Present truck road from camp & dock at
mouth of Cactus Cr. for 1 1/2 mi to new
1000 ft. adit. The 1000 foot adit
level was driven 450 N (fault) along
a strong shear zone. It reported the
adit followed a small 97. vein which
followed the adit for a short dist.

1959 loading dock, camp & 1 1/2 mi road marked
also 3" air line from road end to 2400 point

Berton Gold (Abco)

1937; A40 - only tested Au - by important not given
1938; A38 - " " " " " "

F.69 - The Premier Mining Co. line
taken over the Abco mines
at the head of Herbert Arm.
16 men employed, so far the
on repairs & exploratory work done
considerable

1942 A31 - To sampling plant; by S.V.
Clayton 0.89 dry tons Au @ 1.48
Ag @ 0.70
in a siliceous gangue.

"Fool's Gold Reports Var Do."

J. S. Stevenson,

In 1938 Premier did considerable
underground work at the Abco - see
Henry Hill.

Total product. From Abco & Big Boy
= 135 tons → 334 oz. Au. hard sorted ore.

* Production on the Abco from a wide
shear zone which strikes N.E. This
shear at least 4' wide and contains
parallel gg veins which seldom exceed
8" in width. The vein matter must
be mined selectively as the wall-rock
does not carry gold.

Suggest to Fritz re clone & leave it up to
him as to whether or not it warrants
a check sampling job on 8 or veins.
