Bill,

The following notes on Soil Samples.

H-Zeni (see field copy 1000-scale April 67 map)

H-1 @ HN 1/2 I.P. East side drainage

H-2 Toe slope

H-3 argillite outcrops. - on road

H-6 west end of trench - on West side of drainage

-7 Dip of drainage

8 West end trench in dip of drainage  
argillite bedrock.

10 drainage

H-11 TRENCH 18 on road

H-17 East side drainage

18 up from drainage

H-20 start on blazed line due South

H-33 Nicola andesite cherty  
sparse pyrite dissem.

## WE Line

WE - 1      1250' South of NW  $\wedge$  Lot 532  
or HN Grid 10 NE/44+00

400' South side of swamp + drainage Westerly

WE - 3      all gentle NE slope

6      NE slope      East side slight depression

WE 7      East of Nicola outcrop cherty to felds. crystals  
light pyrite dissem.

WE - 9      general NE slope to E.  
100' NW is I.P WEN 11/12 - 1961

15      East of outcrop ridge - generally followed  
since WE - 7 - flat summit area

16      dark augite andsite dissem. pyrite

17      augite porphyry. (v.l.)

20  
21      SE slope      cherty - dissem pyrite

24      meta diorite      much dissem pyrite

25      crossed SE depression      creek?

26      cherty Nicola      + 

27      Nicola

35      flat minor SE slope

WE Kuni Page 2

(also see field copy 1000 scale April/67 map)

WE-38 SE drain creek. bank silt.

39 South side up from creek.

↓ general NE slope

47-48 up side hill

49 on flat

49-50 slight grade S20°W

-52 drainage?

WE-53 West of depression

WE 57 S30°E drainage

11

HN 20-25 100' intervals starting 100' from HN-6  
along N edge creek bank.
