

War Eagle ZoneOct. 26/70

Hg. plots → parts of 2 major Hg anomalies.
and 2 or more local (minor)
Hg anomalies.

On this basis plan to extend grids
as required to do controlled Hg.
geochem survey (Barringer) ^{humus or} bore hole or both
prep. to doing hi-power I.P.

Propose I.P. coverage of War Eagle
Hg-anom. areas

Propose I.P. coverage of Santa Maria -
contingent on dd results. -

Note 1970 Hgs on War Eagle soils
may only reflect association of
Hg with more organic soils on level
surface of plateau - hence Hg survey
by optimum procedures mandating
- prob by bore-hole gas tests checked
by humic-soils.
