

Rec'd July 17/67

Toe

Answer this & plan trip - objectives
to be geared to Barringer/6 July 1967
results pending. - Note, he may have to switch

Dear Bell: off detailed display on Toe contact
Echo rece. process. origins OK.

Sketch shows additional staking
completed. Part on the East is missing,
but is completed out to East Boundary
(#17 line)

* N.C. 58/59 area is good solid Tuffs
as we saw on our W-E traverse.

We have partially Soil Sampled
the Toe 60-65 area.

This area is good granite - quartz -
biotite.

Nicola was found as indicated
on the sketch and also finer grain
granites, & Nicola inclusions etc, indicating
a contact near F.P. Toe 64/65.

We will make a traverse up the
South side of the creek to confirm
Rock type there.

Yours John.

N.B. 2nd
