MESSAGE

Dear Bill,

I received two copies of this latest and final Barringer report, so am sending this one to you.

The Bodar-Clegg report was duplicated and so this one may be your copy. Perhaps I am short one set of sheets, but have not plotted the North end to know.

The Toe Group recce. will be completed this coming weekend. Sampling on 200 ft. spacings and 800 ft. ~~spacings~~ intervals has been done on the better area and the original Toe claims, as well as extensions to the South.

Yours John.

MR. JOHN E. WHITE,  
Box 1179,  
MERRITT, B.C.

NOVEMBER 21, 1967.

DEAR JOHN:

JUST RECEIVED YOURS OF NOV. 19, THANKS. WAS JUST NOW WONDERING IF FRITZ HAD DROPPED IN ON YOU AS HE HAS INDICATED HE WOULD WHILE I WAS OCCUPIED WITH SOME OF HIS OTHER VENTURES?

ENCLOSED IS A COPY OF B-C'S LAB REPORT FOR YOUR SAMPLES 165, 4E . . . . . 19 W. ON; REALIZING YOU MAY HAVE RECEIVED THIS ALREADY. THIS MAY BE THE SHEET YOU ARE LOOKING FOR TO FILL IN THE NORTH END OF CHAL - MAL, ETC. ANYWAY, KEEP IT; I HAVE ONE.

THANKS FOR BARRINGER HG'S; I HADN'T RECEIVED <sup>some of</sup> THIS. <sup>comprise</sup> THESE APPEAR TO BE THE HEFTIEST INDICATIONS TO DATE, WHICH IS ALL THE MORE SIGNIFICANT IN VIEW OF THE OTHER INDICATIONS OF MINERALIZATION. THE HG'S WOULD INDICATE THAT WE HAVE BEDROCK CU ANOMALIES AND NOT JUST TRANSPORTED CU EFFECTS. GOOD PLANNING!

AT THIS DATE, I WOULD SUGGEST YOU KEEP UP YOUR RECORD OF LINE-CUTTING, GEOCH. SOIL-SAMPLE, SUPPLY, TRANSPORTATION EXPENSE, ETC. WHICH MAY BE NECESSARY AND/OR APPLICABLE TO REPORTS SUBMITTED FOR ASSESSMENT CREDITS.

BY THE WAY, HAVE YOU RECEIVED ANY INDICATIONS AS TO WHETHER OR NOT MY REPORT WAS ACCEPTED, AND IF IT COVERED THE LARGER TOE GROUP OR ONLY TOE 1-23? ALSO, DID YOU COMPLETE THE STAKING SUGGESTED IN MY LETTER OF OCT. 24/67. HOPE IT'S BEEN POSSIBLE.

HOPE TO SEE YOU & DISCUSS RESULTS TO DATE - BEFORE XMAS!  
AM TRYING OUT A NEW MAGNETOMETER IN THE NEXT FEW DAYS - MAY BE O.K. FOR MAL-CHAL & TOE EVENTUAL SURVEYS.

P.S. ANY DEER YET?

REGARDS & DON'T FORGET YOUR PLUMB BOB.  
Bill
