

DESCRIPTION.

The "D. A." is a vein about 20 inches wide, with a pay-streak of 4 to 12 inches; from this 5,653 lbs. of ore was shipped to the smelter, giving \$103.15 gold per ton, silver 74 7-10 ozs., and 2 per cent. lead. A tunnel is being driven on this vein from which ore is being taken. On the same property is a larger vein (quartz) carrying galena and pyrites.

The "G. A. R." has a 30-foot shaft on a 2-foot vein, heavily mineralized with an intimate mixture of iron and copper pyrites, galena, blende and silver. The finest pieces of wire-silver found on Boundary Creek were taken from this shaft. Average assays from different places across the vein gave \$8.00 gold, 50 ozs. silver; also \$8.00 gold and 150 ozs. silver and one, the latest return—\$15.05 gold and 196 4-5 ozs. silver per ton.

On the "Big Ledge" is a 10-foot quartz vein, mineralized with iron pyrites. This vein has been opened up by cross-cuts on the surface for 500 feet. A narrower vein has been opened up, being one foot wide, carrying considerable copper pyrites, and runs into the main ledge as a spur, on which a tunnel of 40 feet has been driven. Average assays gave \$33 gold and 11-10 ozs. silver, and \$49.35 gold 17 1/2 ozs. silver, 2 per cent. copper

The "S. F." lies between the G. A. R. and D. A., in the direction of the strike on the G. A. R. vein. This location has been made on a vein of pyrrhotite.

The "O. B." has two distinct veins, one 25 feet wide which, from its strike and general character would seem to be the same vein as that on the Big Ledge, although sufficient has not been done to make this conclusive. The second vein has at present a width of nearly three feet. Assays have shown values in gold from \$4.00 to \$170.53, while a conservative sampling by Mr. S. S. Fowler, M. E. gave \$20.00 in gold.

On the "S. H. B." are two converging veins of copper and iron pyrites, on which work is now being done. An average assay gave, gold \$1.50, silver 16 1/2 ozs., copper 11.96 per cent., or \$40.44 for all values.

The "Fred. D." was located in December, 1895, (more or less) on a basis for mining operations for the other claims than for its present value, although there is little doubt that the large vein on the O. B. runs through it. There is a small vein of galena on this claim.

The "J. A. C." has a large iron-capping running through it from the Anaconda, at a depth of a few feet. The ore carries a considerable percentage of copper and \$10 in gold.

The remaining six claims are all good prospects, but as yet very little development work has been done on them.

801965

This company is registered under the Companies Act, 1890, and acts, in the office of the Registrar, Victoria, B. C., for 1,500,000 \$1.00, non-assessable, of which a portion of the Treasury stock is offered at 10 cents a share on application to the company.

LOCAL AND DISTRICT.

The Boundary Creek Times is now published as a semi-weekly, and its new form is a decided improvement over the old.

On the 4th of next month Greenwood will enjoy the distinction of having two local papers, as upon that date the Greenwood Miner will make its appearance.

On Saturday last the first sitting of the County Court of Yale, to be holden in Greenwood was presided over by His Honor Judge Spinks. Only two cases were before the court.

Mr. J. M. Buxton, financial and mining broker, of Vancouver, came in on Friday's stage from Penticton and will spend a few days in the district attending to mining matters.

Mr. Bowles, of Trail, was a passenger on Saturday's stage to Camp McKinney. Mr. Bowles is evidently turning his attention to Camp McKinney with a view of opening out in business there.

The Canadian Pacific is moving the steel for the Robson-Penticton branch at a lively rate. Ten cars loaded with rails for the Robson-Penticton road arrived in Nelson yesterday from the Crow's Nest branch.—Nelson Miner.

The finishing touches are being given to the Owen block situated on the corner of Sixth street and Chamblet avenue. It is said this fine block has been rented, to be occupied as soon as completed, by parties who will open a third hotel in the town.

Mon. Chas. Gire, the well known representative of the St. Maurice Mining Company, in Central camp, and who left here last fall, has after visiting Constantinople, returned to Paris, at which point he will remain for a short time and then return to Midway.

At the County Court held at Grand Forks on Thursday last, M. Downey was brought before Judge Spinks on a charge of attempting to extort money, by personating a constable at Grand Forks, last fall. The case was proven and Downey received a sentence of 12 months' imprisonment.

The many friends of Mr. W. T. Thompson will be glad to learn that he is gradually recovering from the effects of a severe attack of pneumonia which has kept him confined to his bed for

MINING NOTES.

The owners of the Trilby claim in Sylark camp are applying for a crown grant. The Trilby lies next to the Tip Top, which has so recently been bonded, and will be operated by a joint stock company.

In referring to the bonding of the Anarchist claim in our last week's issue, the statement was made that Messrs. Moody and Cummins had secured a bond on the property. This it would seem is hardly correct, as the bond is held by Mr. W. B. Paton of Greenwood.

Work has again been resumed on the Bruce tunnel on Ingram mountain near Midway, and although the present contract calls for only a few feet of work it is expected before the contract is completed the tunnel will be in such a state as will warrant much more work being done.

The Lake claim in Providence camp has been purchased by Spokane parties, represented by F. R. Ginnell, who recently put through the deal on the La Fleur-Comstock properties with the British American Corporation. The Lake adjoins the Last Chance and is considered a promising property, as the ore carries good values in silver and gold, the former predominating.

The Big Swede.

Good progress is being made on the Big Swede tunnel which is now in between 50 and 60 feet. The Big Swede is situated on Meyers creek to the south of Rock creek, and is owned by Messrs. Conkle and Donald who with a third party are doing their own work. The tunnel on the Big Swede was started near one wall and is being driven so as to crosscut the ledge which shows on the surface as a tremendous outcrop of iron fully 150 feet wide and running the whole length of the claim. In this iron could be discovered here and there on the surface some copper, but the cropping was so big it was impossible without a great deal of work to find the richest portion of the ledge. It was therefore decided to drive a tunnel, and cut the ore body at a depth of some 50 feet. This it would seem was a wise resolution for now the tunnel having been driven nearly 60 feet, the copper is gradually coming in and the ore is looking better every day that work is continued. So encouraged are the owners, that they are prosecuting work in the tunnel with great

vigour. The body of ore may be broken into in the Big Swede at any time now.

week. Referring to the business outlook for this year, Mr. McLaren said it was very bright indeed, and referring to Carson in particular he said it would soon be heard from. Miss Elsie McLaren accompanied her father.

Mr. G. E. Sanbourne, representative of W. T. Stanford & Co. at Camp McKinney, is a visitor in town to-day, being a witness in one of the cases before the County Court. Mr. Sanbourne reports things lively in camp and much progress being made in the development of several of the mining properties.

Mr. R. G. Sidley, of Sidley, is a visitor in town to-day. Referring to the Anarchist mountain settlement around which, by the way, there is yet some vacant land, Mr. Sidley said the people are all right, the crops last season were all right, and the price of produce is all right, but the roads provided by the late government are execrable, and must during the summer be put in order so as to provide the people an outlet to the markets of the district.

Mr. C. R. Costerton, of Vernon, was a visitor in town on Friday. Mr. Costerton who is attending to his fire and life insurance business came in on the Penitentiary stage and proceeded on to Greenwood, where he will remain for a few days, and then return to Midway. Accompanying Mr. Costerton, was Mr. G. S. V. Branch who is manager in British Columbia for the Sun Life Assurance Company. This is the first time Mr. Branch has visited this portion of the province.

The Gold Bug.

A tunnel has been started on the Gold Bug a very promising property, owned by Mr. H. Pettendigh of Rock Creek. The tunnel has been started at the base of a big cliff which is cleaved by the vein, thereby allowing the tunnel to be driven on the ledge, and depth to be rapidly gained as it progresses. The property is situated just above Rock Creek on the north side of the Kettle river, and when discovered, some of the outcropping of the vein was assayed and ran well in gold. The vein is about five feet wide as far as prospected, and the vein filling may be classed as free milling quartz carrying gold and a little galena.

A Sad Fatality.

A strange and sad fatality was that which occurred above Rock Creek during the first part of last week, when W. H. Miller, a draughtsman, attached to the C. P. R. survey party under the superintendence of Mr. J. A. Odell, came to his death as the result of exposure and a serious mental state.

It would seem that one of the men working on the survey, came to Rock Creek on Sunday the 22nd leaving the camp at the mouth of James creek in the morning. In the afternoon he returned to camp, and with him Mr. Miller went part of the way. After going some distance the two separated, Mr. Miller to return to Rock Creek, and the other party to proceed to the camp. Instead of returning to Rock Creek, the deceased wandered around for some time, and then about eleven o'clock came near the camp at James creek and shouted while standing about 50 yards away on the trail. One of the men hearing the shouts came out of his tent and as soon as he did so the deceased ran away. This action on the part of the deceased caused the man who came out of his tent to believe it was one of the other boys belonging to the survey party playing pranks, a possible inference as some of the men were sleeping in a cabin a little back from the river while others occupied tents near the stream. Nothing more was heard of the deceased, but in the morning many fresh tracks were noticed near the cabin as if some one had approached it, and then retired several times. An overshoe was also found and recognized as belonging to deceased. This led to a messenger being despatched to Rock Creek to make enquiries and as soon as it was learned that Mr. Miller had not returned there, the messenger made all haste to the camp and a search was at once instituted, with the result that the deceased was found near the trail some distance beyond the camp, in an unconscious condition. Although everything that could be done under the circumstances, was done to restore him, he did not rally, and life gradually ebbed away during the afternoon of the same day.

The body having been moved to Greenwood a post mortem examination was made, with the result that it was disclosed that the deceased died from apoplexy.

BUCKHORN BONDED.

E. A. BIELENBERG MAKES A BIG

Deal—A South Deadwood Camp Property Secured by Eastern Capitalists—Big Figure Paid.—Company to Be Organized.

In many respects one of the biggest deals ever made in connection with Boundary Creek properties was closed on Monday last when the Buckhorn and the adjoining claim the Tintic was sold to eastern capitalists by E. A. Bielenberg. Negotiations for the sale of the property were opened about two months ago, but it was not until the arrival of W. T. McDonald in the city that the final arrangements were made.

The purchasers are good friends of Boundary Creek, men who have unlimited confidence in the resources of the district and plenty of capital to develop any properties they may acquire. They are some of the largest shareholders in the Old Ironsides and Knob Hill properties and include O. G. Labaree of Spokane, Rufus Pope, M. P., S. H. C. Miner of the Granby Rubber Company, W. B. Ives, M. P.

The deal was arranged by O. G. Sabaree representing the syndicate, and W. T. Smith and J. C. Haas representing Mr. Bielenberg. The price paid was \$30,000 cash and 200,000 shares in a company which is being organized with a capital of \$1,500,000 to develop the property.

The Buckhorn is a full sized claim in South Deadwood camp, about two and a half miles from Greenwood. It has been developed by several shafts and 500 feet of open cuts disclosing ore for 1000 feet in length and not less than 400 feet wide. The ore is a rich chalcopryrite giving high copper values and good gold values. Average assays have given \$25.40 in all values.

It is the intention to organize the company at once and begin the work of opening up the property. The principals in the deal or their friends now have big properties in Greenwood, Central and Deadwood camps. There latest purchase is, from surface indications, likely to prove the equal of their big properties which have come rapidly into prominence through extensive development work.

COUNCIL MEETING.

The Telephone Company's Right of Way By-Law Passed—New City Treasurer

for any damages arising from the use of the city's tramway system. The city solicitor suggested an agreement with the contractors. This suggestion was followed and the minutes escaped mutilation.

Messrs. A. T. Kendrick and Holt applied to the council for permission to use the street for building purposes, for established street grade and for compensation for the completion of the culvert on the Copper street fill. The council granted their requests.

J. E. Schon, the medical health officer recommended the appointment of a local board of health and the more rigid enforcement of the provisions of the provincial board of health act. The doctor's suggestions were endorsed by the council.

G. B. Taylor was appointed city treasurer. The question of salary was not decided. Mayor Hardy suggested the appointment of an assessor, but this matter was also deferred.

The council then went into committee for two hours to consider the Boundary Creek Telegraph and Telephone Company's right-of-way by-law.

The different sections were discussed and amended until after two hours consideration the committee reported the by-law as it appears in this issue. Wednesday, February 15, was fixed a polling day, when the electors will be given an opportunity to express their opinions regarding the by-law. G. B. Taylor was appointed returning officer.

Mayor Hardy reported that men had started on the waterworks and that the engineer was preparing plans for the year's work. This outline will include the grading of the main street to the city limits on the Anaconda side of the city as well as the grading of all streets in the centre and Government and Copper streets northward.

It was nearly midnight when the council adjourned.

A LARGE FIRST-CLASS HOTEL

To Be Built in Greenwood at an Early Date. A Four-Story Building.

Graham & Parry of the Imperial hotel have secured plans for a large four-story hotel which will shortly be erected on the corner of Copper and Deadwood streets. The plans show a handsome building having 150 feet frontage on Deadwood street and 50 feet on Copper street. The main entrance will be on Deadwood street. A very wide hall leads from the main entrance and on either side are the dining room, offices, bar-room and billiard room.

There latest purchase is, from surface indications, likely to prove the equal of their big properties which have come rapidly into prominence through extensive development work.

COUNCIL MEETING.

The Telephone Company's Right of Way By-Law Passed—New City Treasurer.

The regular meeting of the city council was held on Monday evening. Mayor Hardy presided and the following aldermen were present: Naden, Galloway, Sutherland and Campbell.

Mayor Hardy considered that there was a great necessity for a procedure by-law and to emphasize the point he suggested the amendment of the minutes of last meeting on a motion to adopt them. The object of the amendment was to make the contractors liable

city as near as the Government and Copper streets northward.

It was nearly midnight when the council adjourned.

A LARGE FIRST-CLASS HOTEL

To Be Built in Greenwood at an Early Date. A Four-Story Building.

Graham & Parry of the Imperial hotel have secured plans for a large four-story hotel which will shortly be erected on the corner of Copper and Deadwood streets. The plans show a handsome building having 150 feet frontage on Deadwood street and 50 feet on Copper street. The main entrance will be on Deadwood street. A very wide hall leads from the main entrance and on either side are the dining room, offices, bar-room and billiard room. The different floors will be well lighted and well finished. All the sitting rooms, bed rooms, etc., will be large and well furnished. The basement will be well lighted and the greater portion will be used as sample rooms. The building when completed will cost over \$15,000.

It is expected that work will begin within three weeks. The erection of the building will give what Greenwood needs—a first-class hotel.

Anarchist Group Bonded.

R. G. Sidley, J. P., of Anarchist mountain, was in the city on Monday. During his visit here negotiations for the bonding of the well known Anarchist group of claims at Camp McKinney were successfully closed. The bond was given by W. B. Paton & Co. of Greenwood, and 10 per cent. of the price mentioned was paid in cash. The group consists of the Anarchist, Dynamite and Success. They have been held by Mr. Sidley for several years and he has done considerable development work. On the Anarchist is one 80-foot and another 60-foot shaft. At the foot of the 80-foot shaft is a ledge 5 feet 9 inches of free-milling ore. An exceptionally good water right goes with the property. There is sufficient power to run a large mill and the trench for the water has already been dug.

The Anarchist group is one of the very best properties in Camp McKinney. They contain good strong ledges which can be worked very cheaply.

A defective stovepipe through the roof, in violation of the fire-by-law, was responsible for a fire at Mrs. Haines' residence on Saturday. Thanks to the efforts of the fireman the blaze was quenched before much damage was done. The alarm was given about one o'clock and soon several of the fire laddies were on the roof with buckets of water which quenched the blaze.

CALUMET BONDED.

ENGLISH SYNDICATE GETS IT

Machinery Purchased for the Last Chance—
Montreal People Interested in the Oro
Denoro—The B. C. to Be Worked on a
Large Scale—County Court.

The Calumet, a Wellington camp property owned by R. C. Johnson and R. McCarren, was bonded this week to an English syndicate represented by Messrs. Haas, Elliott and Stuart. The figure mentioned in the bond has not been made public, but it is understood that it is a large one, and 10 per cent. has been paid in cash.

The Calumet was located in 1894 by R. C. Johnson and R. McCarren. It adjoins the Golden Crown and the Winnipeg, and was under bond for some time to the Golden Crown company. This company threw up the bond last year, not because they did not appreciate the value of the property, but because they wished to confine all their attention to the Golden Crown. The Calumet has been developed by several open cuts and cross-cuts, exposing a large vein of rich pyrrhotite. It is understood that the syndicate intend developing the property at once. The deal was negotiated for the owners by W. S. Keith.

The Oro Denoro.

Montreal capitalists are becoming heavily interested in Summit camp properties. It was a Montreal syndicate who purchased the B. C. mine for \$300,000, and now Montreal people have bought heavily into the King Mining company. The King company own the Oro Denoro in Summit camp. The deal was arranged by Messrs. Curtis and McNish of Rossland. Sufficient capital has been acquired to place the mine on a shipping basis. The force at present working on the Oro Denoro will be increased and a plant purchased for the property.

Work on the B. C.

The Montreal people who purchased the B. C. property have decided to work it upon a large scale. Major Leckie, who put through the deal, is making arrangements to start work on the property. The small plant now on the property will be used temporarily but a large plant has been ordered.

Machinery for the Last Chance.

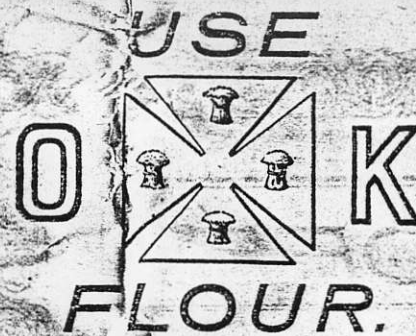

Frank Mendenhall, the Rossland agent for the Jencks Machine company, has sold a plant to the Boundary Creek Mining company, owning the Last Chance mine in Skylark camp. The plant consists of a 50-horse-power boiler, a hoist and pump and steam drills. The Boundary Creek Mining company intend developing the Last Chance on a large scale.

COMPANY'S PROPERTIES.

properties now consist of fourteen claims, viz, the D. A., G. A. R., Big
S. H. B., Fred D., S. F., J. A. C., P. H., C. S. & H., E. C. B,
Prospective, Spokane and Granite Falls.

SIX OF THESE HAVING BEEN ACQUIRED SINCE INCORPORATION

DESCRIPTION.

On the "D. A." is a vein about 20 inches wide, with a pay-streak of 4 to 12 inches; from this 8,653 lbs. of ore was shipped to the smelter, giving \$103.15 gold per ton, silver 74 7-10 ozs., and 2 per cent. lead. A tunnel is being driven on this vein from which ore is being taken. On the same property is a larger vein (quartz) carrying galena and pyrites.

The "G. A. R." has a 30-foot shaft sunk on a 2-foot vein, heavily mineralized with an intimate mixture of iron and copper pyrites, galena, blende and silverglance. The finest pieces of wire silver found on Boundary Creek were taken from this shaft. Average assays from different places across the vein gave \$8.00 gold, 50 ozs. silver; also \$8.00 gold and 150 ozs. silver and one, the best return—\$15.05 gold and 196 4-5 ozs. silver per ton.

The "O. B." has two distinct veins one 25 feet wide which, from its strike and general character would seem to be the same vein as that on the Big Ledge, although sufficient has not been done to make this conclusive. The second vein has at present a width of nearly three feet. Assays have shown values in gold from \$4.00 to \$170.53, while a conservative sampling by Mr. S. S. Fowler, M. E. gave \$20.00 in gold.

On the "S. H. B." are two converging veins of copper and iron pyrites, on which work is now being done. An average assay gave, gold \$1.50, silver 16 1/2 ozs., copper 11.96 per cent., or \$40.44 for all values.

The "Fred D." was located in December, 1895, more as ground for a basis for other claim.

This company is registered under the Companies Act, 1890, and amending acts, in the office of the Registrar in Victoria, B. C., for 1,500,000 shares at \$1.00, non-assessable, of which a portion of the Treasury stock is now

8.00 gold, 50 ozs. silver, and one, the at return—\$15.05 gold and 196 4-5 silver per ton.

On the "Big Ledge" is a 10-foot quartz vein, mineralized with iron pyrites. This vein has been opened up by cross-cuts on the surface for 500 feet. A narrower vein has been opened up, being one foot wide, carrying considerable copper pyrites, and runs into the main ledge as a spur, on which a tunnel of 40 feet has been driven. Average assays gave \$33 gold and 11-10 ozs. silver, and \$49.35 gold 17 1/2 ozs. silver, 2 per cent. copper

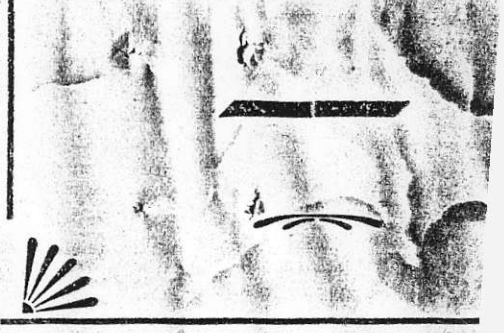

The "S. F." lies between the G. A. R. and D. A., in the direction of the strike on the G. A. R. vein. This location has been made on a vein of pyrrhotite.

The "Fred D." was located in December, 1895, more as ground for a other claims than for its present value, although there is little doubt that the large vein on the O. B. runs through it. There is a small vein of galena on this claim.

The "J. A. C." has a large iron-capping running through it from the Anaconda, at a depth of a few feet. The ore carries a considerable percent age of copper and \$10 in gold.

The remaining six claims are all good prospects, but as yet very little development work has been done on them.

portion of the Treasury stock offered at 10 cents a share in contribution to the company.

THE GOLDEN CROWN

HIGH VALUES IN CROSSCUTS

Good Work Being Done on This Property—
Development on Other Properties—Some
Recent Rich Strikes.

All that was required to prove that the Golden Crown in Wellington camp is rich in ore bodies and high values, was development. Other properties were brought into prominence because drifts and crosscuts run at different levels demonstrated the quantity and quality of the ore. Under the superintendence of Manager G. H. Collins, the working shaft in the Golden Crown is being sunk. Crosscuts are being run at different levels and the result is of a most encouraging nature.

It is only four months since work was resumed on this property. In that time the working shaft was sunk to the 150-foot level. A crosscut was run at the 100-foot level and another at 150 feet. The working shaft runs in ore for the first 40 feet and in country rock for the remainder of the distance. The crosscut at 100 feet encountered a five-foot ore body which gave values that were higher than those on the surface. Average assays, not picked specimens, yielded \$18 to \$22 in gold and copper. The crosscut at 150 feet found an ore body equally large and much higher values. The ore in the lower crosscut averages \$32.80 in gold and nearly four per cent. copper. These values clearly demonstrate that Boundary Creek is not exclusively a low grade district. The mines in Wellington camp that have been more or less developed bring the district above the low grade plane. Drifting

Q. C., J. Jermyn, Wm. Johnson, W. A. Fuller and W. J. Porter.

In addition to those claims owned by big companies, private owners of Wellington camp claims have been doing good work on their properties during the past few months. Messrs. Jones & Rogers, own or have interests in the Hartford, Hartford Fraction, Ranger, and J. & R. fraction. All these claims form a group adjoining the Golden Crown. The Ranger has a big surface showing. A 40-foot shaft has been sunk on the property. Samples sent to Salt Lake from this property averaged \$16 in gold.

The Hartford has a small ledge of very rich ore. A 13-foot shaft was sunk on the vein. The vein widened from 1 inch to 16 inches in this distance. Lying alongside the vein is 2 feet of rock carrying native copper. Average assays from the surface of this property yielded \$18 in gold. There are two other shafts on the property. There is a well-defined ledge on the J. & R. Fraction. (Two shafts have been sunk on the claim.

J. Farrell has done a large amount of development on the Buttercup, another Wellington camp property. There is a fine showing of white quartz carrying copper pyrites. On the Iron-clad, another property in which Mr. Farrell is interested, considerable work has been done. There is a very large surface showing on the property giving from \$3 to \$12 in gold and about 4 per cent. copper.

At the Winnipeg mine the ore body was met from the perpendicular shaft this week. The working shaft, which is down 230 feet, was run on an indine from the 100-foot level. Recently the shaft was continued perpendicularly and a ledge of rich ore was struck in less than ten feet.

NOTICE.

IS hereby given that I will apply to the License Commissioners for the City of Greenwood at their next sitting held after the expiration of thirty days from the date of this notice, for a license to sell by retail spirituous or fermented liquors on the premises to be known as the Pacific Hotel, to be situate on Lot 34, block B in the said city. HENRY B. MADDEN.
Dated at Greenwood, this 27th day of January, A. D. 1899.

Two Bar-
CO.,

is continued on the ore bodies from the crosscuts at the 100 and 150-foot levels. The ore bodies are well defined, being between walls of sienite and diomite. The character of the ore is pyrrhotite and copper pyrites in a silicious gangue.

The Golden Crown is owned by a company whose officers are wide awake business men, and now that transportation is assured at an early date, the mine will be placed on a shipping basis as fast as money, a good plant and a large force of men can do so. The shaft will be sunk to the 300-foot level and crosscuts and drifts run at different levels. The surface workings, the crosscuts and drifts from the shaft, and the showings in the 322-foot tunnel, run last year, all point to the fact that the Golden Crown will justify the expenditure of a large amount of money. Its ore bodies, when mined and marketed will return big dividends on large investments.

The company is officered by the following well known business men: Hon. T. Mayne Daly, ex-minister of the interior, president; Andrew Kelly, Brandon, vice-president; W. L. Orde, Rossland, secretary-treasurer; G. H. Collins, managing director; and Hon. Senator Kirchoffer, W. A. MacDonald,

GREENWOOD, B.C.

Import at M... discussed at the Regular Meeting... the Association.

The Greenwood Mining and Commercial association met in Rendell's hall on Wednesday evening. President Anderson was in the chair. Messrs. W. G. Gaunce and A. M. Rice were elected members of the association. The importance of urging upon the government the necessity for a resident gold commissioner for Boundary Creek district and a government agent for the district lying south of Pentictou were discussed, and Messrs. Keith and Ross were appointed a committee to draft a memorial to the minister of mines relative to the gold commissioner. Messrs. Galloway and Gaunce were appointed a committee to prepare a petition urging the appointment of a resident Government agent. The secretary was instructed to correspond with residents in different centers throughout the district, urging that they circulate similar petitions.

A LARGE ESTABLISHMENT.

The Hunter-Kendrick Company Will Shortly Begin Business in Greenwood.

Another strong business firm has decided to begin business in Greenwood. The Hunter Bros. of Rossland and Mr. Kendrick of Northport have joined forces for the purpose of opening up a large general store. The site was selected some time ago, the two lots at the corner of Copper and Deadwood streets having been purchased for this purpose.

The work of excavating the lots will be begun immediately and a two-story block will be erected thereon. The building will be veneered with corrugated iron, and will be the first of the kind erected in the district.

Hunter Bros. are a well known Kootenay firm who have a large establishment in Rossland and branch stores at different points. Mr. Kendrick is manager of a big general store at Northport. The company intend carrying a big stock of hardware and general merchandise.

Grading Commenced.

Grading has begun on this side of the summit. It is the intention to put on a large force of men near Greenwood immediately, as instructions have come from headquarters that the work must be pushed. The force at the camp near Tillman's mill has also been increased.

Jas. Moran has been working on the Chancellor in Greenwood camp for a crown grant. The work is in 5 feet of ore with only one wall,
