

Name: Berg

Location: 93  
 NTS Area ~~99~~ E/14  
 Lat. 53° 48' 10" Long. 127° 25' 50"  
 Mining Division: Omineca  
 - property located approx. 43-70 miles SW of Houston/Houston  
 located on Hwy. 16 approx. 45 miles from Smithers/a road  
 runs south from Houston parallel to the Bulkley River  
 - property within the Tahtsa range

Owner: Kennco Explorations (Western) Ltd. (option at present by  
 Placer Development Ltd.)

Description: Copper-molybdenum associated with porphyry quartz/monzonite/  
 mineralization occurs in fractures, veins and quartz steel  
 works/disseminations rare/blanket of supergene enrichment  
 has increased the copper grade of the primary mineralization  
 by a factor in the order of 1.25.

Reserves: 400 million tons at .4% Cu and .05% MoS<sub>2</sub> using a  
 25% Cu cutoff grade (CIM Spec. Vol. 15, p. 274).

Development: 1961 - discovery by Kennco Explorations (Western) Ltd.  
 1962-71 - Kennco - mapping, geochemical and geophysical  
 survey, trenching, drilling - 43 holes,  
 27,088'  
 1972 - Placer Development Ltd. option; metallurgical  
 tests, drilling - 48 holes, 31,448'

Potential Open pit  
Operation:
