Metals

copper

Work done

Six men spent two months under the direction of E. R. Wozniak, geologist, diamond drilling 750 feet in two holes and making a geophysical survey of four claims, 1/2 miles of access road was constructed.

References

Description

The area was found to be covered by 100 feet of overburden. Porphyry ^{and hornfels} containing pyrite and trace amounts of chalcopyrite were intersected in the diamond drill holes.
