

Defined by Silver Positioned for Growth Extensive Portfolio

Fact Sheet – January 2011

Silver Standard is a silver producer with the largest silver resource of any publicly-traded silver company. The Pirquitas Mine in Argentina produced 6.3 million ounces of silver in 2010, and is projected to produce 8.5 million ounces of silver in 2011. With an Americas-based portfolio of 14 projects ranging from grassroots to production, a strong balance sheet and technical management team, Silver Standard is well-positioned to deliver sustained growth through silver.

Investment Highlights

- Large land positions in major silver belts
- Americas-focused
- Significant cash balance
- US\$2 billion market cap
- Experienced management and board

Total Silver Reserves & Resources at December 31, 2010 (mil oz)

Proven and Probable Reserves	285.5
Measured and Indicated Resources	993.3
Inferred Resources	403.6

2010 Achievements

- Produced 6.3 million ounces of silver at Pirquitas Mine
- Generated C\$233 million in gross cash proceeds from Pretium Resources Inc. IPO
- Completed feasibility study for San Luis gold-silver project
- Expanded resources at Snowfield and Brucejack Projects and completed preliminary assessment

2011 Plans

- Produce 8.5 million ounces of silver
- Make a production decision at San Luis
- Complete San Agustin preliminary assessment
- Progress Pitarrilla Project
- Explore throughout Mexico, Peru, Chile and Argentina

Largest Growth Profile Amongst Silver Producers

Key Projects

Pirquitas Mine Jujuy Province, Argentina

Pirquitas is a 6,000 tonne/day silver-zinc-tin open pit mine which started commercial production in December 2009. In 2011, it will produce approximately 8.5 million ounces of silver, and the priority for the year is to maintain sustainable production and initiate continuous improvement.

San Luis Ancash, Peru (70%)

A feasibility study on placing the high-grade gold-silver project into production was completed in June 2010. The feasibility study estimates an internal rate of return of 26.5% and a net present value discounted at 5% of \$39.2 million at base case metals prices of \$800/ounce gold and \$12.50/ounce silver. Capital expenditures are estimated to be \$90.4 million for a 400 tonne/day underground mine with average annual production of 78,000 ounces of gold and 1.9 million ounces of silver over a 3.5 year mine life. A production decision for San Luis is anticipated in 2011.

Pitarrilla Durango, Mexico

Pitarrilla is a grassroots discovery made by Silver Standard in 2002 which ranks as one of the largest silver discoveries in the world. In addition to estimated silver reserves of 91.7 million ounces (based on US\$11/oz silver, US\$0.70/lb zinc and US\$50/lb lead), measured and indicated silver resources at Pitarrilla currently total 552 million ounces, plus 82 million inferred silver ounces. A feasibility study is expected in early 2011.

This fact sheet includes certain "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and forward-looking information within the meaning of Canadian securities laws (collectively, "forward-looking statements"). All statements, other than statements of historical fact, included herein, including without limitation, statements regarding potential mineralization and resources, exploration results, production, cost estimates and future plans and objectives of the Company, are forward-looking statements that involve various risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Our forward-looking statements are based on the beliefs, expectations and opinions of management on the date these statements are made, and we do not intend and do not assume any obligation to update any forward-looking statements, other than as required by applicable law. For the reasons set forth above, you should not place undue reliance on forward-looking statements. See "Risks and Uncertainties" and "Risk Factors" in our most recently filed Management Discussion & Analysis and our Annual Report on Form 20-F, as amended, for the year ended December 31, 2009. We have not independently verified the accuracy of the information regarding the mining industry and other market data set forth herein. This information is not intended to provide and should not be relied upon for accounting, legal or tax advice or investment recommendations. You should consult your own advisors as to the accounting, legal, tax, regulatory, business, financial and related aspects of making an investment in the Company. Cautionary Note to US Investors: National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101") is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Unless otherwise indicated, all reserve and resource estimates contained or incorporated by reference in this presentation have been prepared in accordance with NI 43-101 and the Canadian Institute of Mining Metallurgy and Petroleum Classification System. These standards differ significantly from the requirements of the SEC, and reserve and resource information contained herein and incorporated by reference into this presentation may not be comparable to similar information disclosed by U.S. companies. In this In Brief, we use the terms "measured", "indicated" and "inferred" resources. U.S. investors are cautioned that, while such terms are recognized and required by Canadian securities laws, the SEC does not recognize them. Under U.S. standards, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. U.S. investors are cautioned not to assume that all or any part of measured or indicated resources will ever be converted into reserves. U.S. investors should also understand that "inferred resources" have a great amount of uncertainty as to their existence and as to whether they can be mined legally or economically. It cannot be assumed that all or any part of the "inferred resources" will ever be upgraded to a higher category. Therefore, U.S. investors are also cautioned not to assume that all or any part of the inferred resources exist, or that they can be mined legally or economically. Disclosure of "contained ounces" is permitted disclosure under Canadian regulations; however, the SEC only permits issuers to report "resources" as in place tonnage and grade without reference to unit measures. Accordingly, information concerning descriptions of mineralization and resources contained in this presentation, including the documents incorporated by reference therein, may not be comparable to information made public by U.S. companies subject to the reporting and disclosure requirements of the SEC.

Diablillos Salta, Argentina

The silver-gold Diablillos Project is located 275 km south of the Pirquitas Mine. Engineering trade-off studies are being carried out to determine the optimal mining method for the deposit, open pit or underground. On completion of the trade-off studies a Preliminary Assessment to evaluate placing the project into production is anticipated.

San Agustin Durango, Mexico

San Agustin is a gold-silver project with poly-metallic mineralization at depth. In 2011, the potential for a one million ounce gold heap leach operation is being evaluated, and an exploration program is planned to follow up on exploration potential for additional resources.

SILVER STANDARD RESOURCES INC.

SNOWFIELD-BRUCEJACK PRELIMINARY ASSESSMENT SEPT. 13, 2010

The Preliminary Assessment was prepared by Wardrop Engineering Inc., a Tetra Tech Company ("Wardrop").

The estimated mining inventory is comprised of 1,172 million tonnes with an average mill feed grade of 0.74 g/t gold, 4.17 g/t silver, 0.08% copper, 0.01% molybdenum and 0.42 g/t rhenium and which contains 27.8 million ounces of gold, 157.2 million ounces of silver, 2.14 billion pounds of copper, 198.1 million pounds of molybdenum and 487 tonnes of rhenium.

The total capital cost for the Snowfield-Brucejack Project is estimated at US\$3.5 billion and the average operating cost is estimated at US\$9.38/tonne milled with US\$8.77/tonne milled for Snowfield mineralization and US\$12.20/tonne milled for Brucejack mineralization.

Silver Standard Announces Sale of Snowfield and

VANCOUVER, BRITISH COLUMBIA, Oct 29, 2010 (MARKETWIRE via COMTEX News Net (NASDAQ: SSRI)(TSX: SSO) ("Silver Standard or the "Company") today announced the Agreement") to sell its Snowfield and Brucejack Projects in northern British Columbia to a company formed to acquire and explore precious metals projects, led by Robert A. Quinlan. Pursuant to the Agreement, Silver Standard will receive total consideration of \$450 million, consisting of a balance in common shares of Pretium valued at the offering price of such shares under the Pretium offering (the "IPO"). The amount of the purchase price payable in cash will increase by the amount of Pretium under the IPO in excess of \$265 million. On completion of the transaction, Silver Standard is expected to be less than 50%.

"The sale of Snowfield and Brucejack is the culmination of an extensive review of strategic options that are core to capability and strategy whilst monetizing project options that are best positioned to maximize value," said Bob Quartermain, Silver Standard's Chief Executive Officer. "Bob Quartermain has a proven track record in capital markets and the forward focus on Snowfield and Brucejack being given the absolute focus by Pretium to build the company into a world-class definition."

As contemplated by the Sale Agreement, Silver Standard will appoint two nominees to the board of Pretium at closing. The Company will also have the right to purchase or sell securities under at least 10% of the outstanding equity securities of Pretium.

The transaction has been approved by Silver Standard's board of directors and is subject to the completion of the raising by Pretium of a minimum of \$265 million in proceeds under the IPO. The closing is expected to occur by the end of the year. In this news release, all references to \$ refer to Canadian dollars.

Silver Standard is a silver mining company that seeks growth through discovery, the completion of projects and accretive acquisition opportunities.

This news release shall not constitute an offer to sell or the solicitation of an offer to buy securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification in any such state.

Forward Looking Statements: Certain statements in this news release are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and forward-looking information within the meaning of the Securities Act (collectively, "forward-looking statements"). Forward-looking statements are statements that are based on expectations, forecasts or projections and are subject to a variety of risks and uncertainties which could cause actual events or results to differ materially from those stated in the forward-looking statements. Forward-looking statements include, without limitation, the completion of the Snowfield and Brucejack Projects, the closing of the transaction and the anticipated proceeds to Pretium. Forward-looking statements include, but are not limited to, the need to satisfy the conditions set forth
