

Number	Formation	Location	Description
KQ-92-84	Shear Zone	roadcut ^{100m E} of upper Rend m. in gully	sericitic, chloritic weakly alt. sheared anorthosite (~5:1 aspect ratio) @ some Fe-carb. & py
KQ-92-85	alt. anorthosite	N side Lac Pore ~200-300m W of Lac Dore Complex locality trail ~100-150m E of adit ~30m W of ^{along} shortly GSA	of Kotto Creek - pale altered sericitic anorthosite @ ~1-2% py & some ep along fractures & cut by 1-2mm qz veinlets @ sericitic & halos GSA - ~4-5m wide ~NS med grey f.g. dyke @ minor scattered qz phenos. - minor diss py & cut by minute qz veinlets @ minor py & ep
KQ-92-86	McKenzie vein	Portage Narrows ⁻⁸⁵⁰	typical layered quartz, antkenite, tourmaline, pyrite shear Au vein (over 50-70m strike length)
KQ-92-87	" "	" " ⁻¹¹²⁰	B6A - chloritic pyrite & pale sericitic altered wall vein
KQ-92-88	" "	" " ⁻¹¹⁵⁰	typical layered quartz, tourmaline, py, ant. Au vein w/ 10-300m wide massive magnetite shear veins Csl. boudinage @ ^{py porphyry} along strike for Au qz carb veins

British Columbia

KQ-92-89	cc vein in	Omineca Area	(sample from Gerry Ryznar) B9A - small sample relatively massive crystalline cc @ earthy hematite
P.S.		B.C.	B9B - oxidized sooty cc? in stringers in ^{quartz} monzonite? porphyry @ pink (Na art?) alteration halo along stringers

Sulphurets, B.C.

KQ-92-91	qz (cal) qn vein	~200m W of later	91A (found by Dave Visagie) - ~30-50cm ^{transverse} qz-cal veinlets @ qn
KQ-92-92	qz-electrum (sp)	Spi ff vein	high-grade electrum (heavy diss & blebs over ~10x30x15cm) in qz stringers (~20%) in qz-ser-py schist
KQ-92-93	qs stringers	RM-1 Zone ~50m E Marie Zone	qs stringers in QSP alt. rock @ elect. ± raby? + tota? " " " " " " " " " " " "
KQ-92-94	qz-carb (rub) vein	Eend Bielects Zone	~NS qz-carb. veins (~30-40%) in shear zone
		" "	94A - W corner of trench - ~30cm qz vein @ high grade ^{rub}
		~5-6m E of 94A	94B - (E side of creek) ~10cm qz vein @ abundant qn & sp
KQ-92-95	Jack fm.?	~350m W of Brucejack + 350m N of ~400m W of 95A	95A - typical f.g. mas pale grey arenite 95B - rel. mas., buff-wath, carb alt. pale grey limy f.g. arenite
KQ-92-96	Stuhini Group?	small creek ^{along} Brucejack Cr ~60m W down st. of 1991 sample	96A - ~15x30m rusty py carb altered sheared sed. &/or vol.? rock graphite stylonites - ^{part of alt. shear zone}

Number	Formation	Location	Description
KQ-92-96	Stuhini Gp.	~100m W of 96A near top of bare gl. zone ~150m WSW 96B	96B - 50cm-thick drab med. green-grey mafic volcanic breccia (~1-3cm dia clasts) @ dark clastic 96C - pale to med. grey, relatively massive, arenaceous (sl. pyritic) granule cgl. @ qz & large feld. 96D - dark well-bedded mudst. & silst. @ many fault 96E - graded f.g. pale turbiditic s.s. interlayered @ dark graphitic mudstone (photographed) 96EE - basal contact of graded med. f.g. turbiditic.
KQ-92-97	Stuhini Gp. & Mitchell Intr.	SW Sulphurets G. above moraine ~200m E Kerralt ~100m W 97A ~55m W 97B ~20-25m W 97C ~70-90m W 97D ~70-80m W 97E ~90m SSW 97F ~95m W 97G ~100m W 97H ~70-80m W 97I	S.S. unit @ dark argillite angular to rounded, rip-up cl. pl-hb 97A - drab med green-grey vol. br 97B - " polyolithic br (cgl) - arg. & rounded clast 97C - alt. py, po (cp) pl-hb phytic (vol.?) br. 97D - " " ("?) " " porphyry 97E - " " " " " " 97F - " " " (") " " " 97G - " pale grey sil. py " " " 97H - " grn py chlo. rock 97I - pale grey py crenulated qz-ser schist
KQ-92-98	Stuhini Gp. (Mitch. dyke)	South of SW Sulphurets ~200m E of Tectall ~150m E - E side large snow shed ~200m E - pt of dyke above ice	97J - med. green (strongly deformed) chloritic schist 98A - strongly deformed, foliated, med. green chloritic pyritic (~2-3%) mafic vol. rk. (br.?) 98B - relatively massive med. grn-grey pl-hb porphy. 98C - pale to med green-grey well-bedded hornfelsic sedimentary rocks @ minor diss. py
KQ-92-99	Mitchell Intrusion	Cliff N. toe Mitchell Glacier ~60m E 99A ~50m E 99B	(same loc as 98C) 98D - ~2m? wide py (2-3% diss. & veins) alt. pl-hb porphy. minor cpl. py 99A - typical trachytoid (qz) syenite cut by narrow low sil. mag. 99B - " " " " " " " " " " " " 99C - " " " " " " " " " " " cp (~0.6%)
KQ-92-100	Qz-chl-ser-py sch.	~150m W toe Mitchell G. at toe of " " " " " " " " " " " " " " " "	100A - mas. med. green-grey chl. py (~5-7%) alt. and ? on f.g. interbedded cut by ~10-20% qz (py) stockwork 100B - same as 100A @ ~20-30% qz (py)
KQ-92-101	SRB Breccia	N. Side Montgomery Zone	101A - " intrusive breccia @ porphyry frags. & rock flow cp mag.
KQ-92-102	Gp, Mo (Bn.) Qz vein	Sulphurets G. Zone Top of Thresher Creek	(nr KQ-90-145A) quartz vein @ abundant f.g. diss cp & molybdenite & possibly minor bornite.
