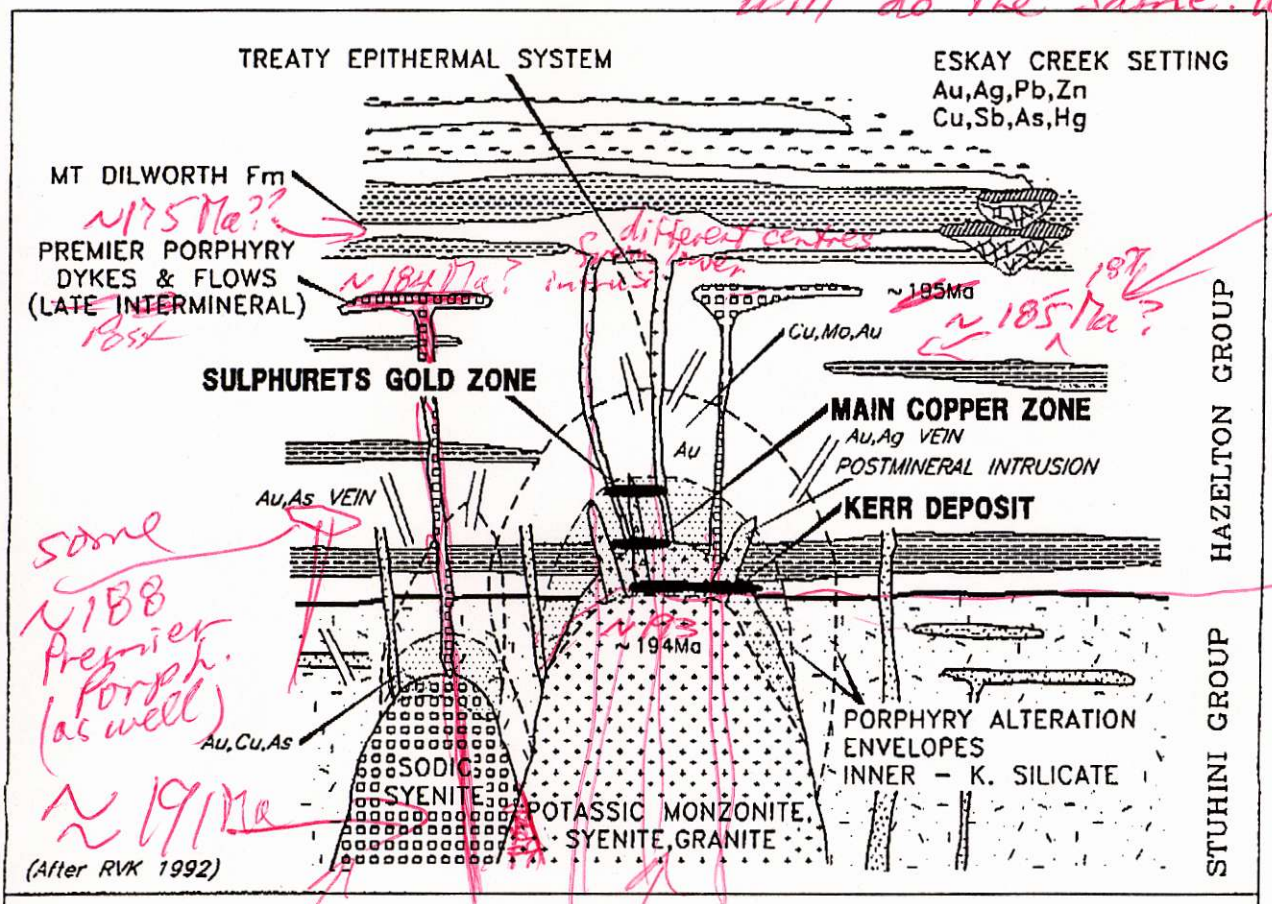
Ron + Brian,

Based on available radiometric dates this diagram requires major revision and I, therefore, recommend that you don't use it. I was hoping to use such a diagram in our paper but Jake was against the idea (primarily because we have different views of timing of events and genesis). I will publish my views separately and I assume that Jake will do the same. Until this is sorted out, this diagram is premature.

Rod



SULPHURETS SCHEMATIC STRATIGRAPHY AND SYNINTRUSIVE, SYNVOLCANIC MINERAL DEPOSITS

host of Snowfield Au + Shore Zone Catear + other Brucejack Veins

unconformity ??

some ~188 Premier Porph. (as well)

~191Ma

younger than ~190Ma ???

That is Porph Cu(Mo) is older!!

Possible?? some Au(As)? related to Cu(Au) but pre-unconf.
