Samples to check for zircons:

H. B. Mtn.

- 1) ddh. #70 - 2471' - 2491' you have already done this sample
- 2) KQ-89-2A ("phaneritic") grandiorite sheet  
-2B ("aplitic" - "granophytic") " "
- 3) KQ-89-5 - Ski Hill Rhyolite  
6A (related lapilli tuff - no sample for dating)
- 4) KQ-89-7C - Si/Van Rhyolite

\* If you see good zircons in any of above have crushed ~~grown~~ for zircon separation.

- 5) KQ-89-8, 8A + 8B - Ashman Ridge type section Tektwa Formation  
(8A' - interlayered matrix? flow? - not for dating)  
- no sample here yet but of rhyolitic ash flows here should be dated.

Kitsault Lake

- KQ-89-27, 28, 30 - fragmental units (dacitic???)  
- no sample yet for dating

Sulphurets KQ-87-74C - albitic (perthitic) "syenite" - check for zircons

Fraser Creek #117a - ~~no sample yet for dating~~ - could sample this summer
