Draft by R/K

March 23/88

F. G. Hewett
Vice President, Exploration
Newhawk Gold Mines Ltd.
Suite 860 - 625 Howe Street
Vancouver, B.C.
V6C 2T6

Dear Mr. Hewett:

Thank you very much for your letter of March 14th and for the kind words about the GSC ~~our~~ project in the Sulphurets area. Although it is rarely documented, we need the support of industry, our most important client. This ^{support} is necessary for obtaining ^{adequate} ~~proper~~ funding for our projects, demonstrating the value of government-sponsored geology and for developing joint federal-provincial programs.

Rod Kirsham tells me that he is about to send you extensive analytical data on Au and Ag, outlining important new Au and

Ag discoveries on your property.

We appreciate your opinions and any suggestions or criticisms about our work.

Yours very truly,

D. C. Findlay,
Director - General.

^
Any others?

March 23/88
Chris
at the P+D, Bruce suggested by Fred that he write the letter.
I have been compiling Au & Ag
data for samples that I collected
during the summers of 1986 and 1987
from Newhawk's ground.
The results are spectacular.
We have evidently discovered both
bulk tonnage low grade and smaller high
grade deposits, that were previously
unrecognized. I will send you a
copy of the letter. Rod
