Mr. Chess Wallace,  
Box 94,  
TOFINO, B.C.

Dear Chess and Mrs. Wallace:

Many thanks for your hospitality and the arrangements made to inspect your Bedwell River and Tofino properties.

Difficult as it is to make decisions on such short property acquaintance, I feel that both properties fail to meet our particular company requirements at this time. This is no reflection on your holdings, but as you appreciate, every property must compete with many others for our attention at any given time, and must be judged in competition with them.

I may take the opportunity to have a closer look at the Tofino property after talking with Presenka, but this would be later in the year and I could not make any commitment of interest at this time.

Yours sincerely,

CYPRUS EXPLORATION CORPORATION, LTD.

Mr. Donald W. Tully  
Cyprus Exploration Corporation Ltd.  
510 West Hastings Street  
Vancouver 2, B. C.

Dear Sir:

I have three different prospects in this area with disseminated mineralization in intrusives.

At Bedwell River I have found chalcopyrite disseminated in the granite. A stock work of quartz veins carries copper with some moly and apparently fairly consistent values in silver. Some of the veinlets assay in gold.

On Mears Island I have found gabbro float with interesting mineralization and some mineralized rock in place. I havn't got an assay on this yet.

At Taylor River right on the highway I staked four claims on mineralized granitic rocks. This mineralization is sparse but over a big area. Some of it seems to carry a fair amount of copper and I have found moly in it.

These properties should warrant more work but I'm broke. I would like to get a payment of \$1,000.00 on a option to examine and go on wages and expense account untill the claims are prospected and examined.

Please let me know if a proposal of this kind would be of interest to your company.

Yours sincerely,

*Halter Guppy*

Dear Sir:-

I have a group of 15 claims (more can be added).  
Big zone of granite several hundred feet wide.  
The granite well mineralized copper etc.

In the granite a large stockwork of quartz  
stringers from 1" - 8". One 4" stringer assayed  
12.5 oz. silver, .5 oz. gold, samples taken from a  
zone twenty feet or more from stringers 1" to 4"  
4.25 oz. gold, 6 oz. silver. Chip samples across  
100' from another place 1.5 oz. silver, .01 oz. gold,  
.08% copper. across another 100 ft - 6 oz. silver  
.35% copper - all from the surface.

My phone 725-3240

Yours truly  
Chess Wallace.
