CYPRUS EXPLORATION CORPORATION LIMITED

From: J G SIMPSON

19 SEPT

Dear Al.

Falcombridge don't seem to
have done the property any
favors and I must confess
that having not made the effort
to get in to the area earlier
in the year I probably won't
be able to do much about it
now.

I will keep the property in
mind when I am in the
general area, but given its no
sale for 1972.

Thanks for the opportunity

All the Best

Jimmy

From: J.G. SIMPSON

Paul.

At Sinclair's property.

Falcombridge did some short
pays holes in 71 result of
which are annotated.

It not as near the suit as
one would like i.e. 30 miles
instead of 3, but there is a
good tenorage potential and
the credits plus magnetic core
might upgrade the theory sufficiently
to consider an underground
operation.

I told Al we would like to make
a field examination, see Falcombridge
charts. Falcombridge have a little
time yet to give a yet or may
for 1972

Re: Sang Is.

I tend to agree that Falconbridge's work takes off most of the bloom although I never feel really satisfied with relatively shallow jackrack holes on this type of thing.

In view of fairly tough access & therefore rel. high cost of working we should probably pass this one up in favour of others in hand & hopefully, to come.

Since you've handled this to date with A.I.S. perhaps you would give him the word. P.

All enclosed reports can be returned to A.I.S. We have copies in file.
