

1979 KODIAK RESOURCES - RELOCATION OF "ICE" GROUP - UNION CARBIDE

LEGEND

- ▲ Brecciated
- Outcrop
- Contour spacing
- Fault (F)
- Fault (F)
- Major topog. line
- Contour
- Approximate topographic boundary
- Intrusive contact
- Tectonic occurrence in outcrop
- Fault (assumed)
- Camp site
- Approximate boundary of ICE claim group
- Urchins intrusions
- Massive schistose quartzites
- White schistose quartzites, minor muscovite quartzites
- Silver-grey mica schist with sporadic interbedded with muscovite quartzites
- Core quartzites, minor quartzite-schist and quartz-muscovite schist
- Black schistose quartzites and quartz-mica schists
- Unmetamorphosed massive quartzites, biotite and/or muscovite quartzites
- Quartzite schistose massive quartzites
- Black quartzite schist
- Garnet schistose schist
- Dark mafic intrusions and calcareous schists
- White quartzite schist with sulphide rich lenses
- Approximate boundary of quartzite schist zone

Geological mapping by C.J. Westerman Aug 25-27, 1971

To accompany a geological report on the Ice Claim Group by R.D. Whitwell, P.Eng., dated July 14, 1972

3725 M-2
