Mr. C.M. Campbell, Jr.,
Mining Engineer,
216 - 602 West Hastings Street,
VANCOUVER, B.C.

C

Dear Charlie: Re: Silver Queen.

I am returning herewith your Report on the above referenced property.

O

The data was studied very carefully both locally and by our New York office.

P

While we feel that the property warrants development the parent office were not prepared to proceed. The principal difficulty is the transportation problem, coupled with the fact that the potential for the property is in the 100-ton per day range.

Y

I hope you will be able to interest capital in the deposit and that you will be successful in developing a payable operation.

Should anything else come to your attention we shall be glad to consider same at any time.

With best regards.

Yours very truly,

Consulting Mining Engineer.

Enc.1.

Roland E. Legg

Silver Queen Property &
Swains Mountain Trust

In case you have not heard through Cy Stewart, we have decided to wash out the Silver Queen property.

Since receiving your letter advising that you had forwarded our suggested deal to Mr. Kent, we have had no word from him. I am assuming that it was your thought that he would get in touch with us in the event that Ventures Ltd. decided to take no action.

Lendall P. Warriner
