510 W. Hastings Street,  
Vancouver, B.C.

Dear Sir:

Enclosed is copy of maps re. the "Dutchy Group" of mineral claims near Invermere, B.C.

You will note that these maps were prepared by Cominco and are the results of their examination of this property.

I feel that Cominco's sampling and assays are very conservative, however they do show the extent of the mineralization and give one a general impression of the prospect.

This property was discovered in the 1890's but has had very little work conducted other than to expose the surface outcrops. As well as the Cu. values there is minor values in Ag. and Au. and it is felt that the early intrest in the property was for potential gold values.

This is probably the best Cu. prospect in the Windermere District and most definately warrants further work including core drilling.

I am anxious to arrange for the exploration of this property during the 1969 season hence our submission to your company.

Mr. W. C. Jones, Geol. of Brisco, B.C. has examined this property and has worked with us on it hence he is familiar with it in a professional sense. Mr. Jones has our authority to act in our behalf and has all available information at his disposal.

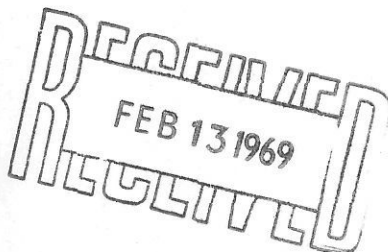

I hope you find the foregoing of intrest and I look forward to your reply.

P.S. If this is of no intrest to your company you may know of someone who might be intrested. Would you then pass it on to them.

Thank you, j.h.c.

Yours truly,  
Windvall Builders Ltd.,

*J. H. Conroy*
