Mr. K. E. Wickstrom
1027-510 W. Hastings Street
Vancouver, British Columbia

Dear Mr. Wickstrom:

Since our meeting in Vancouver on December 12, 1973, I have been able to obtain two reports on the Silver Queen property of Rampart Mines Ltd. (N.P.L.). These are the Rampart Mines Prospectus dated February 15, 1971 and a report on the Silver Queen property by A. Allan dated May 22, 1972. The latter report indicated that other work on the property had been prepared by C. M. Campbell, Jr.; D. C. Malcom; A. P. Fawley; and a previous detailed report by A. Allan.

We would like to look at the information in these and other reports which might be available because the data that we have on hand is too general to form any concrete opinions. We are especially interested in maps, assay, and drill hole data that might be available.

I am looking forward to hearing from you in the near future.

Sincerely,

U. Jansons
Chief Exploration Geologist

UJ/mm

ANVIL MINING CORPORATION LIMITED

Rampart Mines Ltd. (w.p.c.) Silver Queen Property

MESSAGE

Please find attached brief report and initial Prospectus of Rampart Mines Ltd. Ag-Pb-Zn-Cu-Au property. I mentioned this property on my arrival at Anvil. It is one of the better prospects I know of and has a very good chance of developing into a producing mine. The information can be followed up from here or forwarded to the Van office or L.A. Further info can be obtained from K.E. Wickstrom @ 1027-510 W. Hastings St. Van. 688-8358 or 8359.
