Mine Office
Tulameen, B.C.

SILVER HILL MINES LTD.

(NON-PERSONAL LIABILITY)

CAPITAL	3,000,000 shares (Par Value 50c.)
Issued to date for cash and properties	1,450,000 shares
Underwriting and Option agreement to supply \$314,000.00	900,000 "
Remaining in Treasury	650,000 "

PROPERTY:

The Silver Hill Mine consists of 18 adjoining mineral claims located at Summit Camp at an elevation of 4,000 to 5,000 feet on Treasure Mountain about midway between Hope and Princeton, B. C.

Six of the claims are owned outright by the Company. The Dornberg Group of four claims is held under royalty agreement and the Jensen Group of eight claims is held under lease and bond.

TRANSPORTATION:

The property is situated 21 miles by motor road west of Tulameen, a small settlement on the C.P.R., 167 miles east of Vancouver and 350 miles west of the Trail Smelter. The recently constructed Hope-Princeton Highway makes it possible to reach Tulameen by motor car in six hours from Vancouver, B. C.

EQUIPMENT:

The Silver Hill Mine is a completely equipped mining operation with the exception of a mill. Equipment includes camp buildings, power plant and compressor, caterpillar tractor, snow plow and blower, two trucks and all things necessary for the operation of the mine.

GEOLOGICAL AND MINING REPORTS:

The Company has reports on its property by the following well known mining engineers and geologists:

W. G. Norrie-(Lowenthal)
Norman C. Stinnes
J. M. Turnbull
A. M. Richmond
Henry L. Hill
Christopher Riley
F. J. Hemsworth

The latest reports on the property are by Henry L. Hill and F. J. Hemsworth. Mr. Hemsworth says in part:

"I was favourably impressed with the Silver Hill showing. A strong, continuous fissure has been developed, containing ore shoots of Silver, Lead and Zinc minerals in commercial quantities under present economic conditions."

"The Silver Hill Mine has all the indications of developing into a profitable producing property. The structure is strong. The mineralization is principally Lead and Zinc sulphides carrying silver and some cadmium, in a gangue within strong fissure veins."

"I have no hesitation in recommending a vigorous development program to prepare the mine for production."

FINANCES:

The Company has entered into an underwriting and option agreement with Canwest Investments Ltd. which will supply a total of \$314,000.00. The sum of \$314,000.00 is estimated by the Company's engineers to be sufficient to construct a mill and bring the mine into steady production.

MANAGEMENT:

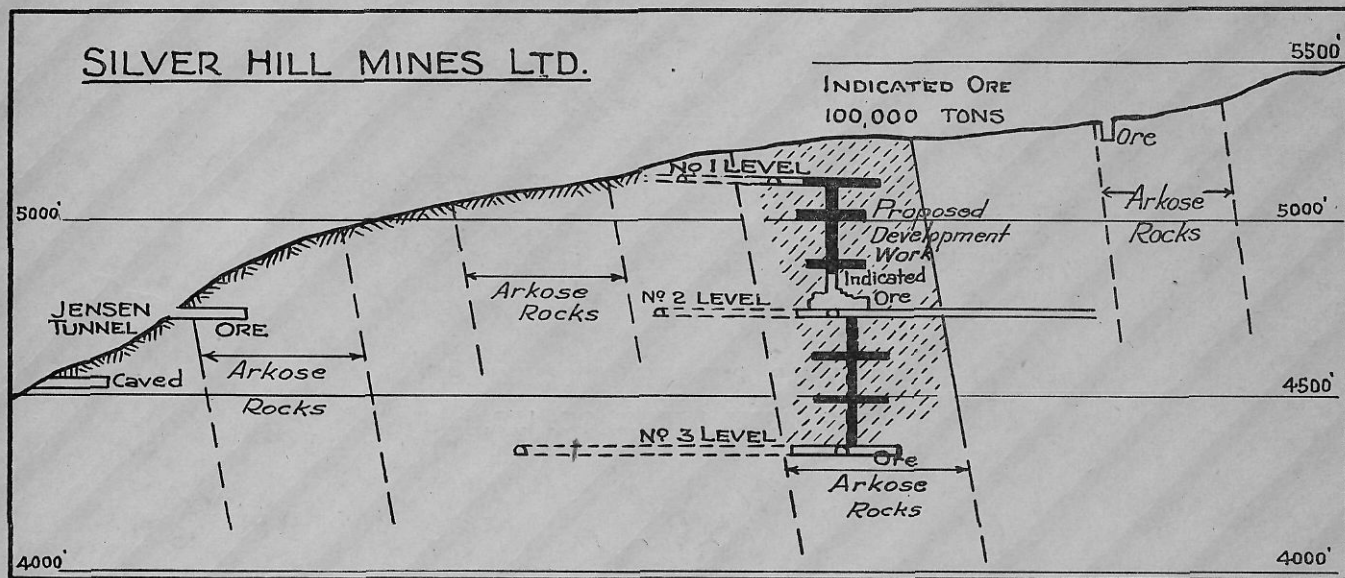

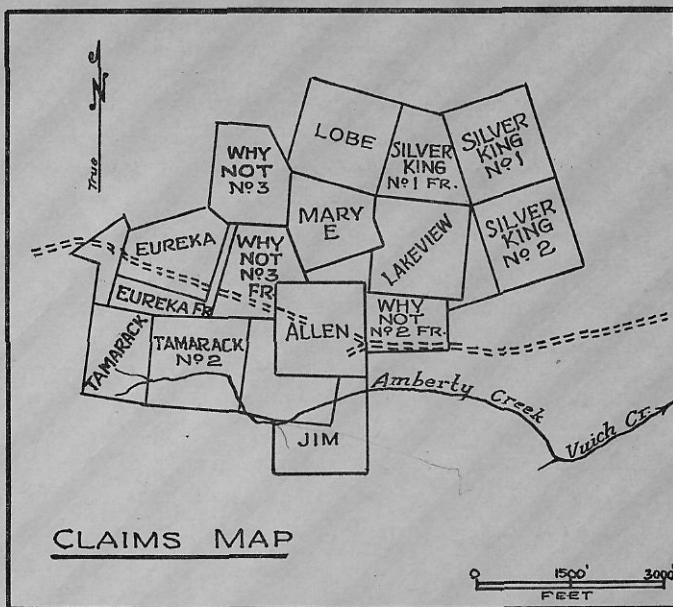

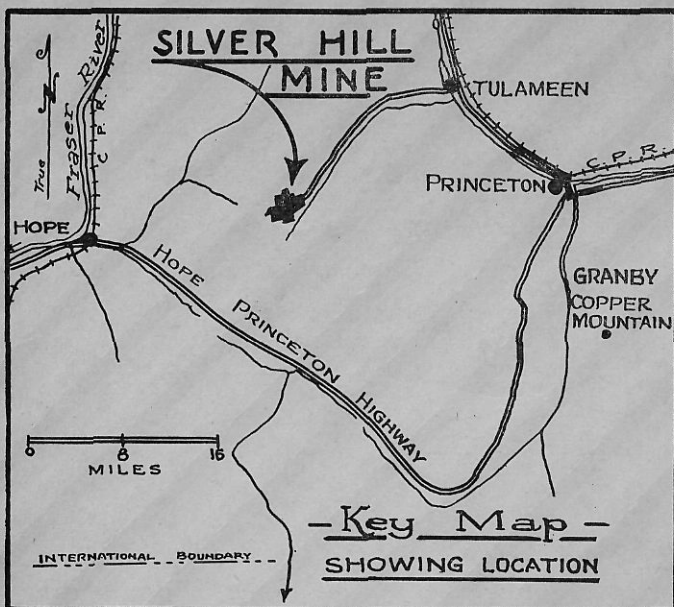

The Board of Directors have appointed a Management Committee comprising of:

F. J. Hemsworth — Professional Mining Engineer.

Dr. Christopher Riley — Mining Geologist and Professional Engineer.

E. L. Borup — Practical Mining Man.

The Company has engaged the firm of Hill, Legg & Hemsworth as their Consulting Engineers.

The following is a tabulation of the chief ore shoots developed to date on the property.

Location	Length Ft.	Width Ft.	Ag. Oz./T.	Pb.	Zn. %	Cd. %	Gross \$ Value/T
No. 1 Level.....	140	2.13	9.3	3.0	8.2		\$ 51.32
No. 2 Level.....	380	.75	63.0	38.0	20.0		281.62
No. 3 local E....	70	1.50	6.14	1.2	23.68	.21	110.68
No. 3 Level W...	45	3.75	3.3	.7	12.00		52.56
