CYPRUS EXPLORATION CORPORATION LTD.
VANCOUVER OFFICE

Date: March 10, 1969

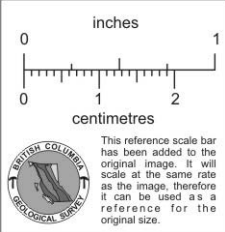

To: Mr. C. A. Mark
From: Mr. D. W. Tully
Subject: TARGETS "H" and "I" ←
STAKING AND AIRBORNE GEOPHYSICS

1. Attached is a sketch of a proposed staking and airborne Mag-E/M program for Target "H" for your approval. The total number of claims proposed is 330. The total number of airborne line miles proposed is 146. It is expected staking will begin about March 15th.
2. Also attached is a sketch of Target "I". Only airborne Mag-E/m reconnaissance is proposed to better define the area we want to stake. It is planned, pending your approval, to do the airborne work as soon as the Bulkley Valley airborne survey project has been completed to continue eastward and do Target "I" followed by Target "H". Included in this work is the proposal to do a couple of trial flights over the Endako orebody at Francois Lake, the Boss Mountain (Noranda) orebody, and the Valley Copper-Lornex-Bethlehem orebodies in the Highland Valley.
