

CYPRIAN EXPLORATION CORPORATION, LTD.

INTER OFFICE MEMO

TO: MR. D. W. TULLY ✓

VANCOUVER OFFICE

DATE February 15th, 1968

FROM: MR. J. B. P. SAWYER

812173

SUBJECT: MULTIPLE MINING COPPER PROSPECT, OSOYOOS AREA.

A Mr. M.V. Nixon of Multiple Mining called this office as a follow up to correspondence from Mr. Ferris of Red Deer Motors concerning prospects which this Company holds in Southern B.C. In particular they have a copper prospect just south of the No. 3. Highway and about six miles West of Osoyoos. I met with Mr. Nixon, and a Mr. Watson of Cranbrook who is a Director of the Company also, this afternoon, and discussed briefly these prospects. The work which has been done on the copper prospect consists of preliminary mapping and some geochemical soil sampling and has been under the supervision of Mr. Ron Renshaw.

I have made tentative arrangements to meet with Mr. Nixon at Osoyoos on Thursday next, February 22nd, with a view to examining the property. I thought this could be worked in with the other examinations which we had planned for next week.

Nixon expects to have a complete report by Renshaw available in the very near future and will send us a copy of it together with maps and plans.

Contact for Nixon is Phone No. 493-0444 in Penticton. This is an unlisted number. His address is 735 Ross Avenue, Penticton.

This Company also holds a property in the Cranbrook area which they regard as having potential as a gold producer. They have agreed to send us all the information they have on this property also and I have suggested that we would take a look at this later when conditions permit.

Mr. Donald W. Tully,
Manager of Exploration,
Cyprus Exploration Corporation Ltd.,
510 West Hastings Street,
VANCOUVER 2, B.C.

Dear Mr. Tully:

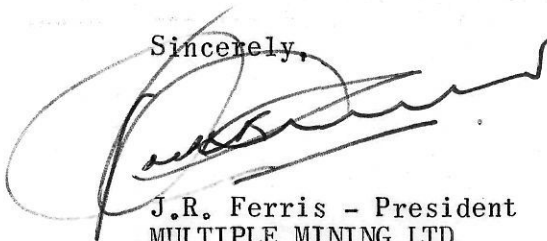

Thank you for your letter of February 6, and your expressed interest in having a look at our properties.

Mr. R.F. (Bob) Watson our Vice President, and Mr. "Red" Nixon our Field Supervisor, plan on being in Vancouver in the next day or two and I have asked them to arrange an appointment with you.

Since the letter that went to Montreal was written we have made some interesting progress. I hope you are able to meet Bob and Red.

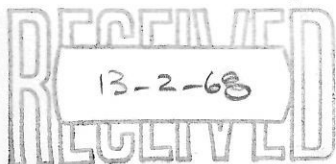

Your name has a familiar sound - are you an Albertan, and did you play hockey Allan Cup style - if "yes", we could probably spend an hour visiting.

Sincerely,

J.R. Ferris - President

Red Deer Motors Canada Ltd.
3110 Gaetz Avenue
RED DEER, Alberta

Dear Mr. Ferris:

Enclosed is a copy of a letter I believe you forwarded to Cyprus Mines Limited in Montreal. Strange as it may seem I did work for this company many years ago and the secretary recognized that I am now with another company of a similar name, Cyprus Mines Corporation of Los Angeles. She was so kind as to forward your letter on to me for a reply as she thought it was we whom you were interested in contacting.

I am interested in hearing from you regarding any of your holdings in copper, lead, zinc and silver.

Please write me if you would like to have our company consider your properties.

Sincerely yours,

CYPRUS EXPLORATION CORP. LTD.

MONTREAL 29, Que.

Dear Mrs. Sheehan:

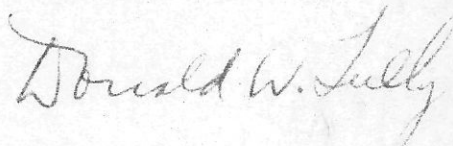

Thank you very much for your letter of January 25th and the attached letter from Red Deer Motors Canada Ltd.

Your letter came as somewhat of a surprise. You are correct, I did work at MacDonald Mines back in 1946. Once in a long time I meet Mr. Campbell whom I believe now lives in Grimsby, Ont.

Thank you again for your letter.

Sincerely yours,

CYPRUS EXPLORATION CORP. LTD.

Mr. D. W. Tully,
Manager of Exploration,
Cyprus Mines Corporation,
510 West Hastings St.,
Vancouver, B.C.

Dear Mr. Tully:-

I am enclosing a letter which came to us, which I believe is intended for you, as we get mail intended for your Company because of the confusion of name.

Actually I believe I recognize your photo in the Northern Miner from some old snaps of Macdonald Mines back in 1948 or so, though we never met. I was in Troop's office and am still with the Company, as Secretary-Treasurer. Dr. Street is President and John Campbell is still a director.

Congratulations on your new appointment, and best wishes for the future.

Yours truly,

CYPRUS MINES LTD. (NPL)

Cyprus Mines Ltd.,
2005 Peel Street,
Montreal 2, P. Q.

Dear Sirs:

Mr. Patrick, Minister of Industry in Alberta, has given me the name of your Company as one interested in the development of ore bodies.

I am involved in a Company which has some interesting holdings in the Silver, Lead, Zinc minerals in the Nelson area, and Copper holdings in the Osoyoos area, both in British Columbia.

While we have not done a lot of work on our Copper claims, the examination we have had indicates a reason for more extensive exploration. Assays taken have shown Copper, a little Silver, and a trace of Molybdenum to the value of approximately \$4.20 a ton. We have staked ninety-six claims in one block in this area, and approximately eighty-eight are valid claims, the balance having prior rights established. They are located approximately eight miles west of Osoyoos and probably about thirty-five miles south of the Brenda property.

Accessibility is good, the terrain can be pretty well traversed in a Jeep, and open pit mining should be a relatively simple matter.

We believe from the anomalies outlined that a thorough drilling program could be a productive program.

The Silver, Lead, Zinc holdings involved two to three hundred acres north of Nelson, B. C., in the Ainsworth, Kaslo, Gerrard area. We are endeavouring to block out or outline the extent of the ore bodies at one location at the present time and have a crew under a qualified Geologist busy drilling there now.

"The busiest garage in town"

The ore samples here are assaying from thirty dollars a ton to two hundred and twenty-nine dollars a ton, and we believe we have better than 200,000 tons determined now at this level.

Since we have only looked at about an acre of this holding and it consists of two hundred, we believe that it is conceivable that we might be on to a very good mine here.

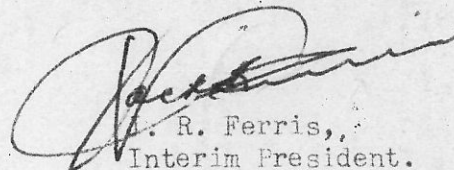

We are a private Company with limited funds. By the end of January we will have spent around eighty thousand dollars on the exploration work at both Osoyoos and the area north of Nelson.

Right now, we are trying to decide whether it would be better to raise more moeny and bring the Silver, Lead, Zinc into production, then go back and finish our exploratory work on the Copper claims, or to invite participation from a major firm such as yours.

I would be delighted to hear from you with your reactions to such an idea and would be happy to meet with you after the first of the new year to discuss our program in detail and any proposition you might care to put forward.

Yours very truly,

MULTIPLE MINING LTD.,

A. R. Ferris,
Interim President.
