20% participating

(2) Coal data on 6,000 acres w/ Chetwynd for TJA - get from CTB

(3) Quesnel Lake Pb-Zn-U property
4 units on N. arm Quesnel Lk. held by other party. CTB will check out. CANC to get BCOM geochem. data on 93A/93B out 26 May + pay $\frac{1}{2}$ CTB expenses to accurately locate. CTB will negotiate deal for himself w/ vendor then approach CANC

(4) Stock play - Good Hope Resources Ltd. - Caribou property Hedley dist.

Inez/Gwen

① Check for stratiform W_3 in whatever host units are — presumably old Tom/Sidemaker from old reports

② If not a stratiform deposit, what about sparn tonnage potential

③ Specifics:

i) Au in sparn or in exhalites ???

ii) Cu in "volcanics" @ W end of L33

iii) W N of 5N

iv) Mo particularly in L15 100m - 120m W & on L1N ~ 50m W all in "margonite"
