Dear Sir:

Bowser Resources was incorporated in July 1969, with a 3-million share capitalization. The property comprises 400 claims in the McBride River area, forty miles southeast of Dease Lake, B.C.

Exploration on the claim group was late getting started this season. It has been limited to reconnaissance geochemical work, prospecting for the source of copper-bearing boulders, and bulldozer trenching which is currently underway. The dimensions of the target areas have yet to be determined. Anomalous geochem results in copper were found and prospection has revealed several copper-bearing structures.

Dr. R. H. Seraphim prepared a report as a result of a brief visit to the property on September 6th. A copy is enclosed for your information.

Very truly yours,
BOWSER RESOURCES LIMITED.

Donald W. Tully,
President.
