

Watson Lake. March 3. - 66

Dear sir

In 1956 I and two of my friends, L. Leebman and E. Carmen found a copper prospect about 10 air miles east of Smith River airport. B.C. I like this one. Gordon Miller of Con West looked at it in June. The same year, and again in September, and the next spring they sent Al. Story in I was working for Con West at the time, and I took them in, well they did not take it. Later on in 1957 Leebman took a man in from Prospectors Airway. I don't know. maybe it was you. if not I'm sure you can find out who, and what he thought of it. If you think it is right then I would like to go in and shake it. The showing is in heavy timber. This would be a place for a J. P. Redstone has been asking about this one. but I was not home at the time. We had 20 claims staked. Of my two partners Louis Leebman past away, and Erik Carmen had a stroke and went back to England a two years ago, and have not been heard from since. No one has been in to this showing since Prospectors Airways man was there. It is ~~at~~ between 15-20 miles to walk in there from lake.

Let me hear from you.

The best to you
