

NOTE: Except where otherwise indicated bedrock is thought to be medium-grained biotite-quartz monzonite with various amounts of augite syenite in the form of dikes.

LEGEND

- Pink and gray, porphyritic augite syenite dikes
- Fracture trend with direction of dip indicated (inclined / vertical)
- Bulldozer trenches
- Zones of moderate hydrothermal alteration

NORTH OF TRENCH NO. 3 IS UNDERLAIN BY DIKES OF AUGITE SYENITE. NO ZONES OF ENCOURAGING MINERALIZATION ARE PRESENT.
