% Core Recovery	From	To	Description	Samples				Assays			Averages		
				Sample No.	From	To	Width	Au	Ag	Cu			
80	0	3	Mod. fine, purple volc. fragmental. Non-magn.	5617	0	4	4			0.07			
95	3	21	Mod. fine, gray volc. fragmental. First foot somewhat transitional - pinkish near top.	5618	4	9	5			0.14			
			Magnetic, Native Cu dissemin. and along seams. A few specks chct.	5619	9	14	5			0.22			
			Some 1/8" calcite + epid. seams @ 30°-40° to core. Cuprite Cu, Chct. circa 16-17.	5620	14	19	5			0.24			
			Broken, slickensided chlorite seams @ 17'										
			Slightly coarser towards 20 ft. Cu decreases after 17 ft.	5621	19	22	3			0.18			
	21	5A	Similar, but noticeably coarser from 21 ft.										
Box 1 ends at 24 ft.			w. larger (up to 1") fragments, many red to pink. Slight increase in copper from 22 ft. + stronger from 28 ft.; chct. increases.	5622	22	26	4			0.32			
			Magnetic.	5623	26	30	4			0.35
